Stone Cleaning A Guide For Practitioners:

Stone Cleaning Christopher Andrew, Maureen Young, Kenneth H. Tonge, 1994 **Handbook of Polymers in Stone Conservation** Elisabetta Princi, 2014-11-20 This handbook is dedicated to the conservation of stone materials by the application of polymers A short introduction on polymer chemistry is given to highlight their characteristics and properties After the physical and chemical attributes of stone are summarised the problems related to its degradation are discussed Finally the properties of the various polymers of potential value for stone restoration are reviewed and classified by schemes and tables and pointers for the future are suggested This handbook will be of great interest to those who share the author's enthusiasm for stone artworks and her dedication to their restoration and conservation **Stone Conservation** Clifford A. Price, Eric Doehne, 2011-02-15 First published in 1996 this volume has been substantially updated to reflect new research in the conservation of stone monuments sculpture and archaeological sites **Specifications for Building Conservation** Rory Cullen, Rick Meier, 2017-09-19 In Specifications for Building Conservation the National Trust draws on a range of case studies and specifications to provide a much needed guide to specification writing for building conservation Although traditional building accounts for approximately a quarter of all buildings in the UK the old skills and understanding required for their care and maintenance have been increasingly eroded over the last century As the largest heritage charity in Europe the National Trust has a first class reputation for high standards of conservation and care and in this three volume set the Trust brings together a remarkable pool of expertise to guide conservation professionals and students through the process of successful specification writing This first book focusses on the materials used for the external fabric detailing successful approaches employed by the National Trust at some of their most culturally significant sites A range of studies have been carefully selected for their interest diversity and practicality showcasing projects from stonework repairs on the magnificent Grade I listed Hardwick Hall to the re thatching of the traditional cottages of the Holnicote Estate Complete with a practical Conservation Management Plan checklist this book will enable practitioners to develop their skills allowing them to make informed decisions when working on a range of project types This is the first practical guide to specification writing for building conservation and the advice provided by the National Trust experts will be of interest to any practitioners and students involved in building conservation both in the UK and beyond Profits generated from the sale of this publication will go to the National Trust Building Apprenticeship Scheme This provides placements for traditional skills at National Trust properties **Stone Decay** B.J. Smith, A. Turkington, 2016-01-08 This volume offers valuable insights into the nature of decay processes and the factors that control them It presents several studies on the impact of pollution on stonework in urban environments Important methodological contributions cover the mapping of facades to explain rates of decay associated with conservation actions the laboratory simulation of corrosion in polluted atmospheres the quantification of colour change through a study of the artificial ageing of building stone The effectiveness of stone treatments within the

laboratory is also considered **Prevention of Premature Staining in New Buildings** Phil Parnham,2002-11 By using a number of highly illustrated case studies the author answers questions such as What causes premature staining How can it be avoided The book suggests measures that should be taken to prevent the appearance of ugly staining **Building**

Pathology David S. Watt,2009-05-12 Building pathology provides an interdisciplinary approach to the study of defects and performance in order to develop appropriate remedial and management solutions It considers how the structure and materials of a building relate to its environment its occupants and the way the building is used so as to develop a better understanding of building failures This book provides a well illustrated introduction to the discipline of building pathology bridging the gap between current approaches to the surveying of buildings and the detailed study of defect diagnosis prognosis and remediation It features a number of case studies and a detailed set of references and further reading This second edition has been updated to reflect changes in legislation guidance and construction and provides new case studies that demonstrate the breadth and depth of the subject Cleaning Techniques in Conservation Practice Norman R.

Weiss,Kyle C. Normandin,Deborah Slaton,2015-12-08 This book is being simultaneously published as a special issue of the Journal of Architectural Conservation and presents the very latest research and developments in the cleaning of buildings sculpture and monuments It covers both wet and dry micro abrasive systems other types of abrasives laser cleaning methods and proprietary poultices for specialized applications The material presented is supported by case study examples from an international selection of major buildings and monuments where the techniques have recently been tried and tested

Conservation of Historic Graveyards Ingval Maxwell,Ratish Nanda,Dennis Urquhart,2001 Illustrating the relationship between animals and people and the struggle to survive that many animals face day in day out this book reveals how many types of animals are in danger of extinction as they are hunted for their skin teeth and bones and how other species have become threatened because humans have destroyed their habitats All sections of the animal world are represented from butterflies beetles and bugs to snakes and larger mammals bears big cats and elephants The text explains what is currently being done to protect these endangered animals and how research is helping experts to understand what can be done to preserve them and their habitats in the future **Residential Property Appraisal** Phil Parnham,Larry Russen,2022-11-30

Residential Property Appraisal Volumes 1 and 2 are handbooks not only for students studying residential surveying but also for those involved in the appraisal of residential property Volume 1 has been updated and covers the valuation process as it relates to residential properties particularly when valuation is undertaken for secured lending purposes It addresses the basic skills required the risks posed in a valuation the key drivers of value emerging issues that impact valuation and the key legal and RICS regulatory considerations that a valuer needs to understand Volume 2 of the series goes on to consider the practical aspects of the survey and inspection of residential properties in more detail Not only does this include updated sections on the most common defects for example building movement moisture problems wood rot and wood boring insects it

also covers emerging challenges including assessing personal safety hazards modern construction technologies and materials and invasive plants The volume also takes account of the Home Survey Standard recently published by the RICS and the changes resulting from climate change the energy crisis and concerns about fire safety Building services in domestic residential properties is another area of rapid change especially with the development of low carbon and renewable technologies To ensure that this aspect is covered in sufficient detail the content is to be included in Volume 3 Assessing Building Services An essential book for students studying to enter the residential survey and valuation profession and for existing practitioners who wish to improve their knowledge of current practices

Digital Participation and Collaboration in Architectural Design Richard Laing, 2018-08-15 The emergence of new digital and visualisation technologies in recent years has led to rapid changes in the field of architecture Current drives to incorporate building information modelling as a part of architectural design are giving way to the increased use of IT and visualisation in architectural design user participation and group collaboration As digital methods become more mainstream *Digital Participation and Collaboration in Architectural Design* provides an accessible and engaging introduction to this emerging subject Supported by selected examples from research and practice the book offers an overview of theories techniques and approaches which readers can apply in their own work In doing so it shows how these techniques can influence communication debate and understanding and encourages readers to see familiar buildings from original and unusual perspectives An ideal starting point for anyone interested in the application of digital techniques the book will help students and professionals in architectural design and digital architecture to understand and embrace new technologies

Cleaning Historic Buildings: v. 1 Nicola Ashurst, 2016-01-08 What happens to the fabric of a historic building if it is not cleaned What is soiling how does it affect the building What cleaning methods should be used This first of a comprehensive two volume guide addresses these important and controversial questions along with many others and offers practical guidance on appropriate cleaning techniques backed up with useful case study material Based on the author's extensive on site involvement at trial and contract stage in many cleaning and surface repair projects this book examines the various attitudes and current cleaning practices along with the role and need for analysis of substrates and soiling It also offers advice on dealing with special cleaning problems such as the removal of paint graffiti and metallic stains and provides an assessment of the cleaning methods currently available

Stone Deterioration in Polluted Urban Environments David Mitchell, D.E. Searle, 2004 It is perhaps because fishes live in a buoyant medium whether it be fresh or sea water that they show a diversity in body shapes that is unparalleled by other vertebrates There is also a unique diversity in the modes of reproduction whether by external or internal fertilization and this with the morphology and fine structure of the reproductive system and its components is the subject of the present volume A large part of this book deals with the ultrastructure of spermatozoa with some discussion of phylogenetic implications
