## **Storage And Distribution Brc Standard:**

**BRC Global Standard** British Retail Consortium, BRC, 2006 Storage and distribution is the link between all stages of the product supply chain and retail. The introduction and the implementation of this Standard represents the efforts made to ensure product safety and integrity through the supply chain. The Standard contains separate modules for the different sectors within the supply chain namely storage, distribution, wholesaling and contracted specialist services offered by storage companies such as product inspection, sorting, contract packing, repacking, assembly, packing, quantity control, inspection, contract chilling, freezing, defrost operations. EU Regulations No 178/2002, No 853/2004 legally oblige food storage and distribution companies to ensure systems are in place to supply safe and legal products. Meeting the requirements of the BRC Storage and Distribution Standard ensures best practice standards are developed, implemented and maintained for any organisation involved in the storage and or distribution of goods. Storage and distributor companies can be certified against this Standard to demonstrate their competence in maintaining product safety and integrity. The Standard is equally relevant to companies storing and or distributing food, consumer goods and packaging. The Standard is applicable to all forms of transportation. **BRC Global Standard** British Retail Consortium, 2006-08-21 No public library discount on this item.

Global standard for storage and distribution British Retail Consortium, 2010-09-03 The new updated Global Standard for Storage and Distribution Issue 2 will replace Storage and Distribution Issue 1 for all audits from March 2011. The Standard provides certification for the section of the supply chain between BRC Standards for the manufacture of food packaging and consumer products and the end user of these products, the retailer food service company. Aimed at companies involved in the storage and distribution of goods, the new Standard represents a substantial upgrade to Issue 1 and builds upon experience with a new layout, simpler presentation and clearer explanation of requirements. The Standard is designed to ensure best practice in the handling, storage and distribution of products and to promote continuous improvement in operating practices. The updated Standard includes the audit requirements, scheme rules and background to the Standard and provides the basis for an accredited certification of sites storing and or distributing food packaging and consumer products. It also enables certification of sites that wholesale products or carry out a range of contracted services. **BRC Global Standard** British Retail Consortium, 2007.
