Dynamic Econometrics For Empirical Macroeconomic Modelling Ragnar

Nymoen, 2019-07-09 For Masters and PhD students in Economics In this textbook the duality between the equilibrium concept used in dynamic economic theory and the stationarity of economic variables is explained and used in the presentation of single equations models and system of equations such as VARs recursive models and simultaneous equations models The book also contains chapters on exogeneity in the context of estimation policy analysis and forecasting automatic computer based variable selection and how it can aid in the specification of an empirical macroeconomic model and finally on a common framework for model based economic forecasting Supplementary materials and notes are available on the publisher's website

New Introduction to Multiple Time Series Analysis Helmut Lütkepohl, 2007-07-26 This is the new and

totally revised edition of L. K. Pohl's classic 1991 work. It provides a detailed introduction to the main steps of analyzing multiple time series model specification estimation model checking and for using the models for economic analysis and forecasting. The book now includes new chapters on cointegration analysis structural vector autoregressions cointegrated VARMA processes and multivariate ARCH models. The book bridges the gap to the difficult technical literature on the topic. It is accessible to graduate students in business and economics. In addition multiple time series courses in other fields such as statistics and engineering may be based on it.

Structure, conduct and performance of maize markets in Malawi Ochieng, Dennis O., Botha, Rosemary, Baulch, Bob, 2019-08-21 Seasonal analysis of the structure conduct and performance SCP of markets for staple crops has received relatively little attention in food policy analysis yet it has important implications for food and nutrition security This study employs a mixed methods approach to analyze the SCP of maize markets in Malawi in the 2018 19 main harvest and lean seasons We interviewed 749 traders from 74 markets across 8 districts held 28 focus group discussions FGD with a total of 480 farmers and analyzed daily and weekly price data from 13 regional markets The structure of maize markets was explored by examining marketing channels barriers to entry and the competitiveness of different tiers of the marketing chain Inequality in sales revenues switches in trader types between seasons quality and weights standardization and the behavior of traders were used to examine market conduct Performance was assessed by examining traders costs and margins and the spatial and temporal integration of maize markets We find that Malawi s maize market is pyramidal in structure and highly competitive at lower tiers of trade but oligopolistic at higher tiers The market channels vary across seasons with switches between trader types and instances of rural urban trade reversals There is considerable inequality of sales revenues among traders of similar capacities and a widespread lack of structured trading despite existing institutions A high ratio of marketing costs to revenue suggests marketing inefficiencies Malawi maize prices were highly seasonal and more volatile than neighboring countries In contrast to previous studies our findings show weak spatial integration of markets and slow price adjustments to long run equilibrium values even among short distance market pairs The study highlights five pathways to improving Malawi s maize marketing system 1 increased policy predictability to promote private sector investment 2 institutionalization of quality grades and standardization of weights and measures 3 increased commercialization of

smallholder maize production 4 investment in enabling infrastructure and 5 the promotion of structured trading

Jansen van Rensburg, 2024-07-31 There is broad consensus in the literature that job creation and productive employment are critical for building a vibrant inclusive economy The digital era has the potential to expand employment by creating new professional pathways and market opportunities particularly in Africa which has high levels of unemployment and considerable room for enhanced economic activity However advancing digital technologies also pose risks and concerns notably that machines will increasingly take over the jobs of humans The effects of digital developments on employment therefore warrant thorough investigation This book delves into the effects of digital developments on employment in Africa using both qualitative and quantitative research methods An important premise in the book is that employment is a leading determinant of inclusive growth which has become a policy imperative across the continent Despite a wide range of views on digital developments and employment there is no well established empirically determined relationship between these two

phenomena in Africa which makes policy making difficult The book addresses this research gap giving specific attention to the fact that African countries are far from homogeneous evidenced by their highly diverse economic activities and varying levels of development The book is essential reading for scholars in the development economics discipline who have an interest in policy studies and in gaining a holistic appreciation of the employment effects of digital developments in Africa Such insights will go a long way towards shaping countries economic and digital policies and putting the continent onto a steadier path towards its digital future

Handbook on Food Raghbendra Jha,Raghav Gaiha,Anil B. Deolalikar,2014-01-01 This volume is a welcome and timely contribution to a topic of enduring importance The global consequences of recent food price crises underscore the need to examine food security issues from diverse perspectives This volume meets that need featuring accessible yet cutting edge analyses of food security by leading experts in fields as diverse as trade nutrition public health production political economy and behavioral economics It will be of interest to a wide range of scholars and practitioners Steven Block Tufts University US This excellent volume offers a compact but wide ranging survey of recent research on important changes in global food markets Its 20 chapters accurately capture important areas of scholarly agreement as well as on going debates among economists studying agriculture and nutrition with several provocative original contributions from other fields The book draws particularly on the authors long experience in Asia offering widely applicable insights for scholars and policy analysts seeking to understand the past present and future of food around the world William A Masters Tufts University US The global population is forecasted to reach 9.4 billion by 2050 with much of this increase concentrated in developing regions and cities Ensuring adequate food and nourishment to this large population is a pressing economic moral and even security challenge and requires research and action from a multi disciplinary perspective This book provides the first such integrated approach to tackling this problem by addressing the multiplicity of challenges posed by rising global population diet diversification and urbanization in developing countries and climate change It examines key topics such as the impact of prosperity on food demand the role of international trade in addressing food insecurity the challenge posed by greenhouse gas emissions from agriculture and land degradation the implication on labor markets of severe under nutrition viability of small scale farms strategies to augment food availability The Handbook on Food would be a welcome supplementary text for courses on development economics particularly those concentrating on agricultural development climate change and food availability as well as nutrition

Africa's digital future Ali Parry,Susara J. Jansen van Rensburg,2021-12-31 The main thrust of this book is to examine whether Africa is in a position to benefit from the digital age given the continent's many development challenges and slow adoption of digital technologies While there is substantial literature on the digital economy and the quickening pace of the Fourth Industrial Revolution 4IR comparatively little research has been conducted on what the digital age means for Africa This book aims to close this research gap by using various qualitative and quantitative research methodologies to arrive at a cross section of original findings and

perspectives on how Africa can capitalise on the benefits of digital developments including their potential to create jobs and bring about more inclusive growth The book s main contribution is its coverage of a range of topics that will affect Africa s digital future including industrialisation global value chains transport and logistics trade facilitation labour market dynamics employment and education The theme of digital trade forms a backdrop to many of the chapters along with references to the COVID 19 pandemic The book acknowledges that although African countries should learn from international best practices they need to chart their own course according to their own particular circumstances By adopting a digital mindset countries should be able to diversify economically and extend their market reach across the continent Furthermore while Africa should be looking to the future and determining how digital technologies can become effective tools of sustainable development the continent has much catching up to do

The African Journal of Finance and Management ,2008 **Applied Time Series Econometrics** Alemayehu Geda,2012-12-29 This book attempts to demystify time series econometrics so as to equip macroeconomic researchers focusing on Africa with solid but accessible foundation in applied time series techniques that can deal with challenges of developing economic models using African data

Introduction to Econometrics James H. Stock,Mark W. Watson,2018-11-06 Ensure students grasp the relevance of econometrics with Introduction to Econometrics the text that connects modern theory and practice with motivating engaging applications The 4th Edition maintains a focus on currency while building on the philosophy that applications should drive the theory not the other way around The text incorporates real world questions and data and methods that are immediately relevant to the applications With very large data sets increasingly being used in economics and related fields a new chapter dedicated to Big Data helps students learn about this growing and exciting area This coverage and approach make the subject come alive for students and helps them to become sophisticated consumers of econometrics Publisher s description

Introduction of the Euro and the Monetary Policy of the European Central Bank Shigeyuki Hamori,Naoko Hamori,2010 The Euro area is an extremely unique and important currency area for two reasons First it is the single largest currency area to be created in an industrialized region In a sense the Euro area is important as a test case for those contemplating the establishment of new currency areas in East Asia North America or other industrialized regions Second it was established by sovereign states working as peers who despite various challenges peacefully and autonomously decided to create a single currency area In other words the Euro area is very different from other currency areas created by countries formerly in colonial relationships with each other Therefore for regions emerging from a developing status and forming a currency area the Euro area could serve as a model case Marking the 10th anniversary of the creation of the European Central Bank ECB and the Euro this invaluable book analyzes the monetary policy of the ECB the guardian of the Euro by using recently developed econometric methods The analysis performed in this book marks a substantial contribution toward understanding the significance of the Euro area as well as the future of the Euro from an international perspective
