Stories Beneath Our Skin English Edition:

Getting Under Our Skin Lisa T. Sarasohn, 2021-09-21 How vermin went from being part of everyone's life to a mark of disease filth and lower status For most of our time on this planet vermin were considered humanity's common inheritance Fleas lice bedbugs and rats were universal scourges as pervasive as hunger or cold at home in both palaces and hovels But with the spread of microscopic close ups of these creatures the beginnings of sanitary standards and the rising belief that cleanliness equaled class vermin began to provide a way to scratch a different itch the need to feel superior and to justify the exploitation of those pronounced ethnically and entomologically inferior In *Getting Under Our Skin* Lisa T. Sarasohn tells the fascinating story of how vermin came to signify the individuals and classes that society impugns and ostracizes How did these creatures go from annoyance to social stigma And how did people thought verminous become considered almost a species of vermin themselves Focusing on Great Britain and North America Sarasohn explains how the label vermin makes dehumanization and violence possible She describes how Cromwellians in Ireland and US cavalry on the American frontier both justified slaughter by warning Nits grow into lice Nazis not only labeled Jews as vermin they used insecticides in the gas chambers to kill them during the Holocaust Concentrating on the insects living in our bodies clothes and beds Sarasohn also looks at rats and their social impact Besides their powerful symbolic status in all cultures rats endurance challenges all human pretensions From eighteenth century London merchants anointing their carved bedsteads with roasted cat to repel bedbugs to modern day hedge fund managers hoping neighbors won't notice exterminators in their penthouses the studies in this book reveal that vermin continue to fuel our prejudices and threaten our status *Getting Under Our Skin* will appeal to cultural historians naturalists and to anyone who has ever scratched and then gazed in horror **Beneath the Skin of**

The Best American Short Stories ... and the Yearbook of the American Short Story, 1918 The Government of Cattel. Divided Into Three Books, Etc Leonard MASCALL, 1662 **Subterranean Imaginaries and Groundwater**

Narratives Deborah Wardle, 2023-10-04 This book interrogates the problems of how and why largely unseen matter in this case groundwater has found limited expression in climate fiction. It explores key considerations for writing groundwater narratives in the Anthropocene. The book investigates a unique selection of climate fiction alongside an exploration of hydrosocial environmental humanities through a focus on groundwater and groundwater narratives. Providing eco-critical analysis with creative fiction and non-fiction excerpts interwoven throughout and drawing on Indigenous Australian and Australian settler novels and poems alongside European American and Japanese texts, the book illuminates the processes of storying with subterranean waters, their facts, uncertainties, potencies, and vulnerabilities. In a time when the water crisis in an Australian and worldwide context is escalating in response to global warming, giving voice to the complexities of groundwater extraction and pollution is vital. Drawing from non-representational posthumanist and feminist perspectives, the book provides an important contribution to transnational comparative climate fiction analysis, enabling an interdisciplinary exchange between hydrogeological science and the eco-humanities. This book is an engaging read for scholars and students in creative writing, environmental humanities, cultural and post-colonial studies, Australian studies, and eco-critical literary studies. Writers and thinkers addressing the problems of the Anthropocene are called to pay attention to the importance of subterranean imaginaries and groundwater narratives.

Subversive Spiritualities Frédérique Apffel-Marglin, 2011 Even in the twenty-first century, some two-thirds of the world's peoples quietly live in non-modern, non-cosmopolitan places. In such places, the multitudinous voices of the spirits, deities, and other denizens of the other-than-human world continue to be heard, continue to be loved or feared, or both, continue to accompany human beings in all their activities. In *Subversive Spiritualities*, Frédérique Apffel-Marglin draws on a lifetime of work with the indigenous peoples of Peru and India to support her argument that the beliefs, values, and practices of such traditional peoples are eco-metaphysically true. In other words, they recognize that human beings are in communion with other beings in nature that have agency and are kinds of spiritual intelligences with whom humans can be in relationship and communion. Ritual is the medium for communicating, reciprocating, creating, and working with the other-than-humans who daily remind the humans that the world is not for human exclusive use. Apffel-Marglin argues that when such relationships are appropriately robust, human lifeways are rich, rewarding, and in the

contemporary jargon environmentally sustainable Her ultimate objective is to re entangle humans in nature by promoting a spirituality and ecology of belonging and connection to nature and an appreciation of animistic perception and ecologies Along the way she offers provocative and poignant critiques of many assumptions of the development paradigm as benign including feminist forms of development advocacy of most anthropological and other social scientific understandings of indigenous religions and of common views about peasant and indigenous agronomy She concludes with a case study of the fair trade movement illuminating both its shortcomings how it echoes some of the assumptions in the development paradigms and its promise as a way to rekindle community between humans as well as between humans and the other than human world
