Tie strengths in social networks are heterogeneous, with strong and weak ties playing different roles at the network and individual levels. Egocentric networks, networks of relationships around an individual, exhibit few strong ties and more weaker ties, as evidenced by electronic communication records. Mobile phone data has also revealed persistent individual differences within this pattern. However, the generality and driving mechanisms of social tie strength heterogeneity remain unclear. Here, we study tie strengths in egocentric networks across multiple datasets of interactions between millions of people during months to years. We find universality in tie strength distributions and their individual-level variation across communication modes, even in channels not reflecting offline social relationships. Via a simple model of egocentric network evolution, we show that the observed universality arises from the competition between cumulative advantage and random choice, two tie reinforcement mechanisms whose balance determines the diversity of tie strengths. Our results provide insight into the driving mechanisms of tie strength heterogeneity in social networks and have implications for the understanding of social network structure and individual behavior.

Social networks are key to the exchange of ideas, norms, and other cultural constructs in human society¹, influencing the way we communicate², support each other^{3,4}, and form enduring communities⁵. Decades of research have focused on regularities in the patterns of relations among individuals⁶ as well as the drivers and mechanisms behind their origin⁷. One particularly prominent feature of social networks is the diversity of tie strengths⁸, where strong ties are typically embedded within social groups while weak ties are crucial for the cohesiveness of the network as a whole^{9–11}. At the micro level, ego networks—the sets of social ties between an individual (the ego) and their family, friends, and acquaintances (the alters)—commonly feature a small core of close relationships. These close relationships are associated with high emotional intensity and they are surrounded by a larger number of weaker ties. The emergence of this characteristic structural pattern has been associated with

constraints on maintaining social relationships, which include limited information processing capacity¹², social cognition^{13–15}, and time availability^{16–17}.

Studies of human communication via mobile phones have shown that in line with the above picture, there is a consistent, general pattern in egocentric networks where a small number of close alters receive a disproportionately large share of communication. Data on the frequency of mobile phone calls and text messages also indicate that within this general pattern, there are clear and persistent individual differences^{18–22}: some people repeatedly focus most of their attention on a few close relationships, while others tend to distribute communication among their alters more evenly²³. These differences are stable in time even under high personal network turnover. However, the mechanisms that generate such heterogeneity of tie strengths, its individual-level variation, and the generality of this pattern beyond

Using Egocentric Networks To Understand Communication:

Management in Marketing Communications ,2024-10-09 This book provides a comprehensive overview of the essential topics in the field of management in marketing communication These substantial topics are examined and addressed by scholars from the marketing and management discipline Beginning with the role of culture as a crucial element in marketing communication the book delves into various matters within the scope of marketing communication Consequently social media and its significance in modern marketing strategies are examined together with the topic of transition from offline to online marketing emphasizing the impact of accelerated digitalization and its onset during the third decade of the twenty first century Furthermore the book discusses the rapid digital transformation stimulated by the COVID 19 pandemic and thus creates room for further exploration and research Throughout the book the evolving dynamics of marketing communication in a digitalized world are examined providing a resource base for scholars conducting research in the context of modern marketing management

The Influence of Technology on Social Network Analysis and Mining Tansel Özyer,Jon Rokne,Gerhard Wagner,Arno H.P. Reuser,2013-03-15 The study of social networks was originated in social and business communities In recent years social network research has advanced significantly the development of sophisticated techniques for Social Network Analysis and Mining SNAM has been highly influenced by the online social Web sites email logs phone logs and instant messaging systems which are widely analyzed using graph theory and machine learning techniques People perceive the Web increasingly as a social medium that fosters interaction among people sharing of experiences and knowledge group activities community formation and evolution This has led to a rising prominence of SNAM in academia politics homeland security and business This follows the pattern of known entities of our society that have evolved into networks in which actors are increasingly dependent on their structural embedding General areas of interest to the book include information science and mathematics communication studies business and organizational studies sociology psychology anthropology applied linguistics biology and medicine

Evolutionary Algorithms, Swarm Dynamics and Complex Networks Ivan Zelinka, Guanrong Chen, 2017-11-25 Evolutionary algorithms constitute a class of well known algorithms which are designed based on the Darwinian theory of evolution and Mendelian theory of heritage They are partly based on random and partly based on deterministic principles Due to this nature it is challenging to predict and control its performance in solving complex nonlinear problems Recently the study of evolutionary dynamics is focused not only on the traditional investigations but also on the understanding and analyzing new principles with the intention of controlling and utilizing their properties and performances toward more effective real world applications In this book based on many years of intensive research of the authors is proposing novel ideas about advancing evolutionary dynamics towards new phenomena including many new topics even the dynamics of equivalent social networks In fact it includes more advanced complex networks and incorporates them with the CMLs coupled map lattices which are usually used for spatiotemporal complex systems simulation and analysis based on the observation that chaos in CML can be controlled so does evolution dynamics All the chapter authors are to the best of our knowledge originators of the ideas mentioned above and researchers on evolutionary algorithms and chaotic dynamics as well as complex networks who will provide benefits to the readers regarding modern scientific research on related subjects

Communications, Signal Processing, and Systems Qilian Liang, Jiasong Mu, Min Jia, Wei Wang, Xuhong Feng, Baoju Zhang, 2018-06-07 This book brings together papers presented at the 2017 International Conference on Communications Signal Processing and Systems ICCSP 2017 which was held on July 14 17 2017 in Harbin China Presenting the latest developments and discussing the interactions and links between these multidisciplinary fields the book spans topics ranging from communications signal processing and systems It is aimed at undergraduate and graduate electrical engineering computer science and mathematics students researchers and engineers from academia and industry as well as government employees

More Than Just Food Garrett Broad, 2016-02-09 The industrial food system has created a crisis

in the United States that is characterized by abundant food for privileged citizens and food deserts for the historically marginalized. In response, food justice activists based in low income communities of color have developed community based solutions arguing that activities like urban agriculture, nutrition education and food related social enterprises can drive systemic social change. Focusing on the work of several food justice groups including Community Services Unlimited, a South Los Angeles organization founded as the nonprofit arm of the Southern California Black Panther Party, *More Than Just Food* explores the possibilities and limitations of the community based approach offering a networked examination of the food justice movement in the age of the nonprofit industrial complex.

Managing Big Data Integration in the Public Sector
 Aggarwal, Anil, 2015-11-12. The era of rapidly progressing technology we live in generates vast amounts of data; however, the challenge exists in understanding how to aggressively monitor and make sense of this data. Without a better understanding of how to collect and manage such large data sets, it becomes increasingly difficult to successfully utilize them. *Managing Big Data Integration in the Public Sector* is a pivotal reference source for the latest scholarly research on the application of big data analytics in government contexts and identifies various strategies in which big data platforms can generate improvements within that sector. Highlighting issues surrounding data management, current models and real world applications, this book is ideally designed for professionals, government agencies, researchers and non profit organizations interested in the benefits of big data analytics applied in the public sphere.

Ubiquitous Intelligence and Computing
 Zhiwen Yu, Ramiro Liscano, Guanling Chen, Daqing Zhang, Xingshe Zhou, 2010-10-05. Ubiquitous sensors, devices, networks and information are paving the way toward a smart world in which computational intelligence is distributed throughout the physical environment to provide reliable and relevant services to people. This ubiquitous intelligence will change the computing landscape because it will enable new breeds of applications and systems to be developed and the realm of computing possibilities will be significantly extended. By enhancing everyday objects with intelligence, many tasks and processes could be simplified; the physical spaces where people interact like workplaces and homes could become more efficient, safer and more enjoyable. Ubiquitous computing or pervasive computing uses these many smart things or things to create smart environments, services and applications. A smart thing can be endowed with different levels of intelligence and may be context aware, active, interactive, reactive, proactive, assistive, adaptive, automated, sentient, perceptual, cognitive, autonomic and/or thinking. Research on ubiquitous intelligence is an emerging research field covering many disciplines. A series of grand challenges exists to move from the current level of computing services to the smart world of adaptive and intelligent services. Started in 2005, the series of UIC conferences has been held in Taipei, Nagasaki, Three Gorges, China, Hong Kong, Oslo and Brisbane. The proceedings contain the papers presented at the 7th International Conference on Ubiquitous Intelligence and Computing (UIC 2010) held in Xi'an, China, October 26-29, 2010. The conference was accompanied by six vibrant workshops on a variety of research challenges within the area of ubiquitous intelligence and computing.

Information Search, Integration, and Personalization Dimitris Kotzinos, Dominique Laurent, Jean-Marc Petit, Nicolas Spyrtatos, Yuzuru Tanaka, 2017-10-01 This book constitutes the revised selected papers of the 11th International Workshop on Information Search Integration and Personalization ISIP 2016 held in Lyon France in November 2016 The 8 revised full papers presented were carefully reviewed and selected from 13 papers submitted to these post conference proceedings from 30 conference presentations The papers are organized in topical sections on exploratory analysis mobility data analysis and management of large data graphs Innovative Approaches of Data Visualization and Visual Analytics Huang, Mao Lin, Huang, Weidong, 2013-07-31 Due to rapid advances in hardware and software technologies network infrastructure and data have become increasingly complex requiring efforts to more effectively comprehend and analyze network topologies and information systems Innovative Approaches of Data Visualization and Visual Analytics evaluates the latest trends and developments in force based data visualization techniques addressing issues in the design development evaluation and application of algorithms and network topologies This book will assist professionals and researchers working in the fields of data analysis and information science as well as students in computer science and computer engineering in developing increasingly effective methods of knowledge creation management and preservation Web Services: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-12-07 Web service technologies are redefining the way that large and small companies are doing business and exchanging information Due to the critical need for furthering automation engagement and efficiency systems and workflows are becoming increasingly more web based Web Services Concepts Methodologies Tools and Applications is an innovative reference source that examines relevant theoretical frameworks current practice guidelines industry standards and standardization and the latest empirical research findings in web services Highlighting a range of topics such as cloud computing quality of service and semantic web this multi volume book is designed for computer engineers IT specialists software designers professionals researchers and upper level students interested in web services architecture frameworks and security *Advanced Data Mining and Applications* Ronghuai Huang, Qiang Yang, Jian Pei, João Gama, Xiaofeng Meng, Xue Li, 2009-08-09 This volume contains the proceedings of the International Conference on Advanced Data Mining and Applications ADMA 2009 held in Beijing China during August 17 19 2009 We are pleased to have a very strong program Acceptance into the conference proceedings was extremely competitive From the 322 submissions from 27 countries and regions the Program Committee selected 34 full papers and 47 short papers for presentation at the conference and inclusion in the proceedings The contributed papers cover a wide range of data mining topics and a diverse spectrum of interesting applications The Program Committee worked very hard to select these papers through a rigorous review process and extensive discussion and finally composed a diverse and exciting program for ADMA 2009 An important feature of the main program was the truly outstanding keynote speakers program Edward Y Chang Director of Research Google China gave a talk titled Confucius and Its Intelligent

Instructional Communication Competence and Instructor Social Presence: Enhancing Teaching and Learning in the Online Environment Sherwyn Morreale, Patrick R. Lowenthal, Janice Thorpe, Larisa Olesova, 2024-05-16

The coronavirus pandemic mandated unexpected instant transitions to remote learning and accelerated student demand for online courses. As a result, colleges and universities in the U.S. and around the world began and have continued to expand their online courses and degree programs. The online learning industry is projected to pass 370 billion by 2026, and one third of post-secondary school administrators indicate they will continue to offer both remote and online course options even after their campuses completely resume offering in-person face-to-face courses. Students have demonstrated there is an increased demand for online courses as well. A national survey of 1,413 students registered at U.S. higher education institutions in fall 2020 and spring 2021 said their experiences with learning remotely during the pandemic left them with a positive attitude toward online and hybrid courses. This increased interest calls attention to the need for more scholarly examination of online teaching and learning.

Network Science with Python David Knickerbocker, 2023-02-28. Discover the use of graph networks to develop a new approach to data science using theoretical and practical methods with this expert guide using Python printed in color. Key Features: Create networks using data points and information; Learn to visualize and analyze networks to better understand communities; Explore the use of network data in both supervised and unsupervised machine learning projects. Purchase of the print or Kindle book includes a free PDF eBook. Book Description: Network analysis is often taught with tiny or toy data sets leaving you with a limited scope of learning and practical usage. Network Science with Python helps you extract relevant data, draw conclusions, and build networks using industry standard practical data sets. You'll begin by learning the basics of natural language processing, network science, and social network analysis, then move on to programmatically building and analyzing networks. You'll get a hands-on understanding of the data source, data extraction, interaction with it, and drawing insights from it. This is a hands-on book with theory grounding, specific technical and mathematical details for future reference. As you progress, you'll learn to construct and clean networks, conduct network analysis, egocentric network analysis, community detection, and use network data with machine learning. You'll also explore network analysis concepts from basics to an advanced level. By the end of the book, you'll be able to identify network data and use it to extract unconventional insights to comprehend the complex world around you. What you will learn: Explore NLP, network science, and social network analysis; Apply the tech stack used for NLP, network science, and analysis; Extract insights from NLP and network data; Generate personalized NLP and network projects; Authenticate and scrape tweets, connections, the web, and data streams; Discover the use of network data in machine learning projects. Who this book is for: Network Science with Python demonstrates how programming and social science can be combined to find new insights. Data scientists, NLP

engineers software engineers social scientists and data science students will find this book useful An intermediate level of Python programming is a prerequisite Readers from both social science and programming backgrounds will find a new perspective and add a feather to their hat **We Too! Gender Equity in Education and the Road to Title IX** Eileen H. Tamura, 2022-08-19 This book provides a comprehensive history of the passage of Title IX the key legislation to bring about gender equity in education Using a variety of primary source material this historical study uses sociological conceptual frameworks to analyze feminist activism in the 1960s that culminated in the 1970s with Title IX and its regulation It mines the field of social network theory and uses concepts from social movement theory to highlight issues that undergirded the struggle to open up the system for women and show how activists were able to achieve their goals Throughout the volume highlights interactions between and among various groups proponents of the women s movements political figures administrative bodies and policy specialists

Researching and Understanding Educational Networks Robert McCormick, Alison Fox, Patrick Carmichael, Richard Procter, 2010-06-25 In the twenty first century what could be more important than networks Such is the power of their influence and attendant technologies that it is unsurprising that our thinking about networks is permeated with images and metaphors from electronic networks This orientation may equally influence thinking about education whether that is of students or teachers Researching and Understanding Educational Networks extends the discussion of educational networks in a unique and novel way by relating it to teacher learning Following an investigation of teacher and school networks in the UK the authors found that theoretical perspectives taken from existing work on such networks were not adequate to provide an understanding of their potential nor to provide the basis for researching them in ways that reflected the variety of teacher experience This book presents analyses of the problems with existing theories of teacher learning which for example draw on ideas of communities of practice and explores what network theories can be brought to the problem of how teachers and schools create and share new knowledge about practice Innovative networking theories discussed include social network analysis social capital theories actor network theory investigations of electronic networks including computer mediated conferencing how people learn at events such as conferences Researching and Understanding Educational Networks explores a new application of networks theories derived from quite different fields of work and extends it both by being concerned about networks beyond organisations and specifically about educational networks Their application to educational networks and to teacher learning in particular is a unique contribution of the book This enables it to be of interest to both researchers and those studying for higher degrees including students who are professionals working in schools

Thank you very much for downloading **Using Egocentric Networks To Understand Communication**. Most likely you have knowledge that, people have look numerous times for their favorite books taking into consideration this Using Egocentric Networks To Understand Communication, but stop in the works in harmful downloads.

Using Egocentric Networks To Understand Communication Introduction

Using Egocentric Networks To Understand Communication Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Using Egocentric Networks To Understand Communication Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Using Egocentric Networks To Understand Communication : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Using Egocentric Networks To Understand Communication : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Using Egocentric Networks To Understand Communication Offers a diverse range of free eBooks across various genres. Using Egocentric Networks To Understand Communication Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Using Egocentric Networks To Understand Communication Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Using Egocentric Networks To Understand Communication, especially related to Using Egocentric Networks To Understand Communication, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Using Egocentric Networks To Understand Communication, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Using Egocentric Networks To Understand Communication books or magazines might include. Look for these in online stores or libraries. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Using Egocentric Networks To Understand Communication full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Using Egocentric Networks To Understand Communication eBooks, including some popular titles.

FAQs About Using Egocentric Networks To Understand Communication Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Using Egocentric Networks To Understand Communication is one of the best book in our library for free trial. We provide copy of Using Egocentric Networks To Understand Communication in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Using Egocentric Networks To Understand Communication. Where to download Using Egocentric Networks To Understand Communication online for free? Are you looking for Using Egocentric Networks To Understand Communication PDF? This is definitely going to save you time and cash in something you should think about.
