Institutional, Economic, and Social Impacts of Globalization and Liberalization Bayar, Yilmaz, 2020-11-06

Globalization is a multi-dimensional concept reflecting the increased economic, social, cultural and political integration of countries. There has been no pinpointed consensus on the history of globalization; however, the globalization process has gained significant speed as of the 1980s in combination with liberalization. Many countries have removed or loosened barriers over the international flows of goods, services and production factors. In this context, both liberalization and globalization have led to considerable institutional, economic, social, cultural and political changes in the world. The liberalization and globalization processes have affected economic units, institutions, cultures, social lives and national and international politics. The Handbook of Research on Institutional, Economic and Social Impacts of Globalization and Liberalization provides a comprehensive evaluation of the institutional, economic and social impacts of globalization and liberalization processes across the world. While highlighting topics like economics, finance, business and public administration, this book is ideally intended for government officials, policymakers, practitioners, stakeholders, researchers and academicians interested in the international impacts of globalization and liberalization across a variety of different domains. Structured around five themes: Educational Interventions, Safeguarding Data and Online Privacy, Engagement in Civic Life, Media Creativity and Production, Digital Media Literacy, the volume as a whole emphasizes the competencies needed to engage in meaningful participation in digital culture. **International Handbook of Universities**, 2009 **The Palgrave Handbook of Globalization with Chinese Characteristics** Paulo Afonso B.
