Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of

literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change. Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays. Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems. Deans nowadays are required to be more than collegial intellectual leaders. They are also meant to be fiscal and human resource experts, fundraisers, politicians, and diplomats. Deanship in the Global South: Bridging Troubled Waters is about the deans' lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account. Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration.

English-Medium Instruction from an English as a Lingua Franca Perspective
 Kumiko Murata, 2018-08-06 English is increasingly used as a lingua franca (ELF) in communicative situations the world over with the acceleration of globalisation. This is in line with the increased introduction of English medium instruction (EMI) to higher education institutions in many parts of the world to further promote both students and faculty's mobility to make them competitive and employable in the globalised world and to make their institutions more attractive and reputable. EMI and ELF however are rarely explicitly investigated together despite the fact that the spread of EMI cannot be separated from that of ELF. This volume tackles the issue head on by focusing on EMI in higher education from an ELF perspective. The volume includes contributions by Asian, European, Middle Eastern, South American and Anglo American scholars. It discusses language policies, attitudes and identities, analyses of classroom EMI practices, case studies and finally pedagogical implications from an ELF perspective incorporating also theoretical and empirical issues in conducting EMI courses programmes. The volume will be of great interest and use not only to those who are conducting research on ELF, EMI, CLIL, language policy and related fields but also to classroom teachers and policy makers who are conducting and/or planning to start EMI courses programmes in their institutions or countries all over the world.

The Role of Context in Language Teachers' Self Development and Motivation
 Amy S. Thompson, 2021-02-09 This book unpacks data from conversations with bi multilingual EFL teachers whose L1s are languages other than English and who are from understudied contexts: Argentina, Egypt, Estonia, Senegal, Turkey, Ukraine and Vietnam to provide insights into the formation of ideal teacher selves. The author discusses the complexities surrounding the development of the teachers' selves and motivation as well as their intertwinement with the sociopolitical realities of their individual contexts. The work reveals how these realities and the specific social interactions that occur therein influence the language learning and teaching processes; it also challenges the notions of and the need for a native/non-native speaker dichotomy in the field. Expanding on Ushioda's 2009 person-in-context approach and reflecting on the multilingual settings of the teachers, the integration of the context-specific politics of language

Struggles for Multilingualism and Linguistic Citizenship Quentin Williams, Ana Deumert, Tommaso M. Milani, 2022-07-08 This book offers a fresh perspective on the social life of multilingualism through the lens of the important notion of linguistic citizenship All of the chapters are underpinned by a theoretical and methodological engagement with linguistic citizenship as a useful heuristic through which to understand sociolinguistic processes in late modernity focusing in particular on linguistic agency and voices on the margins of our societies The authors take stock of conservative liberal progressive and radical social transformations in democracies in the north and south and consider the implications for multilingualism as a resource as a way of life and as a feature of identity politics Each chapter builds on earlier research on linguistic citizenship by illuminating how multilingualism in both theory and practice should be or could be thought of as inclusive when we recognize what multilingual speakers do with language for voice and agency **The Oxford Handbook of Late Colonial**

Insurgencies and Counter-Insurgencies Martin Thomas, Gareth Curless, 2023-10-10 The lethality of conflicts between insurgent groups and counter insurgent security forces has risen markedly since the Second World War just as those of conventional or inter state wars have declined For several decades conflicts within states rather than between them have

been the prevalent form of organised political violence worldwide Recent conflicts in Afghanistan Iraq and Syria have fired interest in colonial experiences of rebellion while current western interventions in sub Saharan Africa have prompted accusations of militarist humanitarianism Yet despite mounting interest in counter insurgency and empire comparative investigation of colonial responses to insurrection and civil disorder is sparse Some scholars have written of a golden age of counter insurgency which began with Britain s declaration of a Malayan Emergency in 1948 and ended with the withdrawal of US ground troops from Vietnam in 1973 It is with this period if not with any presumed golden age that this volume is concerned This Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires It attempts a systematic study of the global effects of organized anti colonial violence in Asia and Africa The objective is to reconceptualize late colonial violence in the European overseas empires by exploring its distinctive character and the globalizing processes underpinning it
