Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists Naturalizing Inequality Michela Marcatelli, 2021-10-05 More than twenty five years after the end of apartheid water access remains a striking reminder of racial inequality in South Africa This book compellingly argues that in the post apartheid period inequality has not only been continuously reproduced but also legitimized Michela Marcatelli unravels this inequality paradox through an ethnography of water in a rural region of the country The Waterberg Plateau is a space where agriculture conservation and extraction coexist and intersect Marcatelli examines the connections between neoliberalism race and the environment by showing that racialized property relations around water and land are still recognized and protected by the post apartheid state to sustain green growth She argues that the government depicts growth as the best if not only solution to inequality While white landowners maintain access to water however black ex farmworkers are dispossessed once again of this essential to life resource If the promise of growth serves to normalize inequality the call to save nature has the effect of naturalizing it even further Populism as Meta Ideology Kire Sharlamanov, 2022-05-06 This book explores the most important aspects of populism as a significant social phenomenon It recapitulates the approaches to defining populism in the social sciences singles out the most important concepts in the definition of populism and presents them to the readership Specific to this book is that it seeks to promote an approach that sees populism as a meta ideology that is an ideology that uses other political ideologies instrumentally In addition the book Populism as Meta Ideology identifies the most important factors that have contributed to the growth of populism in recent times Modernization globalization the crisis of political parties and the transformation of the public sphere have been identified as such factors A chapter is devoted to each of these factors in the

book The book concludes by examining the interaction between populism and liberal democracy both theoretically and practically *Collaborative community partnerships across education settings* Mariëtte P. Trials and Tribulations in the Postcolonial World** Volkan Ipek, Ebru Ilter-Akarcay, 2020-07-06 This volume a product of the first Tricontinental Conference organized by Yeditepe University Istanbul brings together perspectives on democracy and development in Africa the Middle East and Latin America Representing local voices and insight the contributors here respond to the dearth of comparative analysis on these three regions In spite of the differences observed in colonial practices and postcolonial transitions a shared disenchantment with the performance of competitive politics comes to the forefront in these geographical areas Decades after decolonization low intensity democracy and the continuing potential for democratic reversals and backsliding make the study of these three regions relevant Considering the debates on protests social upheavals activism change and continuity this book encourages the reader to survey the various trials and tribulations of the postcolonial era Governing in the Shadows Paula Cristina Roque, 2021-12-01 Reveals the Angolan state's intrusion into citizens' lives in the name of security in stark contrast with governmental neglect in addressing poverty and marginalization Organise or Die? Raphaël Botiveau, 2017-12-01 The story of one of the leading trade unions in South Africa the National Union of Mineworkers and its role in the struggle against white minority rule Organise or Die Democracy and Leadership in South Africa's National Union of Mineworkers NUM is the first in depth study of one of the leading trade unions in the country Founded in 1982 the trade union played a key role in the struggle against white minority rule before turning into a central protagonist of the ruling Tripartite Alliance after apartheid Deftly navigating through workerist social movement and political terrains that shape the South African labour landscape this book sheds light on the path that led to the unprecedented 2012 Marikana massacre the dissolution of the Congress of South African Trade Unions Cosatu federation and to fractures within the African National Congress ANC itself Working with the notions of organisational agency and strategic bureaucratisation Raphaël Botiveau

shows how the founding leadership of NUM built their union's structures with a view to mirror those of the multinational mining companies NUM faced Good leadership proved key to the union's success in recruiting and uniting mineworkers and NUM became an impressive school for union and political cadres producing a number of South Africa's top post-apartheid leaders An incisive analysis of leadership styles and strategies shows how the fragile balance between an increasingly distant leadership and an increasingly militant membership gradually broke down Botiveau provides a compelling narrative of NUM's powerful history and the legacy of its leadership It will appeal to a broad readership including journalists students and social sciences scholars interested in South Africa's contemporary politics and labour history The Archaeology of

Southern Africa Peter Mitchell, 2024-06-06 Some of humanity's earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter-gatherer pastoralist and farmer communities alike New work on pre-colonial states contests models that previously explained their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years *Global Africa* Dorothy Hodgson, Judith Ann-Marie Byfield, 2017-08 *Global Africa* will complicate conventional views of Africa as a place of violence despair and victimhood a place and space that other people states and organizations act on and steal from Instead they aim to document some of the significant global connections circulations and contributions that African people ideas and goods have made in the world not just in the United States but in South Asia Latin America Europe and elsewhere They will showcase new framings of Africa but will not romanticize the conditions and circumstances in which too many people on the continent currently live The essays in this volume will amplify those voices that offer complex and insightful explanations strategies for solutions and inspiration for the future Provided by publisher
