Vaal University Of Technology 2015:

University on the Border Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall. The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution, idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally. The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border. The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution, the university.

Research Universities in Africa Cloete, Nico, Bunting, Ian, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa. Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary. This led to the establishment of the Higher Education Research and Advocacy Network in Africa (Herana) to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa. This book is the final publication to emerge from the Herana project. The project has also published more than 100 articles, chapters, reports, manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana. Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader

anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa
