The Gestalt Shift in Conan Doyle's Sherlock Holmes Stories Michael J. Crowe, 2018-10-10 This book analyzes the four novels and fifty six stories written by Sir Arthur Conan Doyle describing the adventures and discoveries of Sherlock Holmes Michael J Crowe suggests that nearly all the Holmes stories exhibit the pattern known as a Gestalt shift in which suddenly Holmes's efforts reveal a new perspective on the case typically identifying the culprit's and resolving the case Drawing on ideas presented by Thomas S Kuhn in his famous *Structure of Scientific Revolutions* 1962 Crowe argues that similar to the way that Kuhn applied the idea of a Gestalt shift to the history of science this approach can be used to reveal the structure of the Holmes stories and possibly be applied to some other areas of fiction

The Making of British Anthropology, 1813-1871 Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century But the observational practices that characterized the study of human diversity developed from the established sciences of natural history geography and medicine Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study Far from being an evolutionary dead end nineteenth century anthropology laid the foundations for the field based science of anthropology today

Astronomy in India, 1784-1876 Joydeep Sen, 2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the foundation of the Asiatic Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy

Uncommon Contexts: Encounters between Science and Literature, 1800-1914 Ben Marsden, Hazel Hutchinson, Ralph O'Connor, 2016-09-12 Britain in the long nineteenth century developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these new disciplines relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the

disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people lonely

The Age of Scientific Naturalism Bernard Lightman, Michael S. Reidy, 2016-02-19 Physicist John Tyndall and his contemporaries were at the forefront of developing the cosmology of scientific naturalism during the Victorian period They rejected all but physical laws as having any impact on the operations of human life and the universe Contributors focus on the way Tyndall and his correspondents developed their ideas through letters periodicals and scientific journals and challenge previously held assumptions about who gained authority and how they attained and defended their position within the scientific community

Adolphe Quetelet, Social Physics and the Average Men of Science, 1796-1874 Kevin Donnelly, 2015-10-06 Adolphe Quetelet was an influential scientist whose controversial work was condemned by John Stuart Mill and Charles Dickens He was in contact with many Victorian elite including Babbage Herschel and Faraday This is the first scholarly biography of Quetelet exploring his contribution to quantitative reasoning and place in intellectual history

Science and Societies in Frankfurt am Main Ayako Sakurai, 2016-09-12 The nineteenth century saw science move from being the preserve of a small learned elite to a dominant force which influenced society as a whole Sakurai presents a study of how scientific societies affected the social and political life of a city As it did not have a university or a centralized government Frankfurt am Main is an ideal case study of how scientific associations funded by private patronage for the good of the local populace became an important centre for natural history

Staging Science Martin Willis, 2016-06-09 This book considers scientific performances across two centuries from the early nineteenth century to the present day Performances include demonstrations of technologies experiments that look like theatre theatre that looks like science tourist representations and natural history film making Its key aim is to open debate on how scientific activity both historical and contemporary might be understood in the context of performance studies and the imaginative acts required to stage engaging performances Scientific performances have become increasingly of interest to historians of science literature and science scholars and in the field of science studies As yet however no work has sought to examine a range of scientific performances with the aim of interrogating and illuminating the kinds of critical and theoretical practices that might be employed to engage with them With scientific performance likely to become ever more central to scholarly study in the next few years this volume offer a timely and early intervention in the existing debates and aims too to be a touchstone for future work
