User Manual Standards:

The Highway Design and Maintenance Standards Model: User's manual for the HDM-III model Thawat Watanatada, World Bank, 1987 This book describes the Highway Design and Maintenance Standards model HDM III and its constituent components and provides a comprehensive discussion of the submodels their interaction and the operational parameters involved The HDM III is designed to make comparative cost estimates and economic evaluations of different construction and maintenance options including different time staging strategies either for a given road project on a specific alignment or for groups of links on an entire network The user can search for the alternative with the lowest discounted total cost and can call for rates of return net present values or first year benefits If the HDM is used in conjunction with the Expenditure Budgeting Model the set of design and maintenance options that would minimize total discounted transport costs or maximize net present value of an entire highway system under year to year budget constraints can be determined The HDM III model is not only a readily usable program for handling voluminous computations automatically it is also a repository of the most extensive and consistent set of empirical data on the subject The information includes the qualitative structure and quantitative parameters of relationships among construction standards maintenance traffic characteristics road deterioration and vehicle operating costs

MIS Users' Manual ,1984 **Publications of the National Bureau of Standards** United States. National Bureau of Standards, 1982 **Publications of the National Institute of Standards and Technology ...
