Introduction

The Universal Software Radio Peripheral, or USRP (pronounced "usurp") is designed to allow general purpose computers to function as high bandwidth software radios. In essence, it serves as a digital baseband and IF section of a radio communication system. In addition, it has a well-defined electrical and mechanical interface to RF front-ends (daughterboards) which can translate between that IF or baseband and the RF bands of interest.

The basic design philosophy behind the USRP has been to do all of the waveform-specific processing, like modulation and demodulation, on the host CPU. All of the high-speed general purpose operations like digital up- and downconversion, decimation and interpolation are done on the FPGA.

It is anticipated that the majority of USRP users will never need to use anything other than the standard FPGA configuration. However, for those users that wish to, the FPGA design may be changed or replaced. All of the interfaces are well defined and documented.

Inside Radio: An Attack and Defense Guide Qing Yang, Lin Huang, 2018-03-19 This book discusses the security issues in a wide range of wireless devices and systems such as RFID Bluetooth ZigBee GSM LTE and GPS It collects the findings of recent research by the UnicornTeam at 360 Technology and reviews the state of the art literature on wireless security The book also offers detailed case studies and theoretical treatments specifically it lists numerous laboratory procedures results plots commands and screenshots from real world experiments It is a valuable reference guide for practitioners and researchers who want to learn more about the advanced research findings and use the off the shelf tools to explore the wireless world

z/OS V1.11 DFSMS Release Guide Mary Lovelace, Andre Luiz Coelho Da Silva, Anthony Fletcher, Juergen Hoerner, Norbert Schlumberger, Hien Troung, Craig Vernon, IBM Redbooks, 2010-11-19 Each release of data facility storage management subsystem DFSMS builds upon the previous version to provide enhanced storage management data access device support program management and distributed data access for the z OS platform in a system managed storage environment This IBM Redbooks publication provides a summary of the functions and enhancements in z OS V1R11 DFSMS It provides you with the information that you need to understand and evaluate the content of this DFSMS release along with practical implementation hints and tips Also included are enhancements that were made available through an enabling PTF that has been integrated into z OS DFSMS V1R11 This book was written for storage professionals and system programmers who have experience with the components of DFSMS It provides sufficient information so that you can start prioritizing the implementation of new functions and evaluating their applicability in your DFSMS environment

The Car Hacker's Handbook Craig Smith, 2016-03-01 Modern cars are more computerized than ever Infotainment and navigation systems Wi Fi automatic software updates and other innovations aim to make driving more convenient But vehicle technologies haven't kept pace with today's more hostile security environment leaving millions vulnerable to attack The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems Then once you have an understanding of a vehicle's communication network you'll learn how to intercept data and perform specific hacks to track vehicles unlock doors glitch engines flood communication and more With a focus on low cost open source hacking tools such as Metasploit Wireshark Kayak can utils and ChipWhisperer The Car Hacker's Handbook will show you how to Build an accurate threat model for your vehicle Reverse engineer the CAN bus to fake engine signals Exploit vulnerabilities in diagnostic and data logging systems Hack the ECU and other firmware and embedded systems Feed exploits through infotainment and vehicle to vehicle communication systems Override factory settings with performance tuning techniques Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer make The Car Hacker's Handbook your first stop

Optimizing

Automation in Engineering With Energy Systems and Communication Networks Balyan, Vipin, Varshney, Tarun, Gupta, Sandeep, Gupta, Gunjan, 2025-07-23 Optimizing automation in engineering relies on the integration of advanced energy systems and communication networks As industries move toward smarter more efficient operations the collaboration between automation technologies sustainable energy solutions and real time data exchange is essential Effective communication networks enable coordination in automated systems while intelligent energy management ensures reliability and sustainability This convergence enhances system performance and reduces operational costs while supporting the demand for environmentally responsible engineering solutions Exploring this integration may offer valuable insights into the future of automated engineering and its role in smarter infrastructure *Optimizing Automation in Engineering With Energy Systems and Communication Networks* explores how the integration of automation energy systems and communication networks can improve efficiency reliability and sustainability in engineering applications It examines the ways in which real time data exchange and intelligent energy management contribute to optimizing automated processes and infrastructure This book covers topics such as data science fuzzy logic and sustainability and is a useful resource for engineers business owners academicians researchers and data scientists

Mobile and Ubiquitous Systems: Computing, Networking and Services Shangguan Longfei, Priyantha Bodhi, 2023-06-26 This book constitutes the refereed post conference proceedings of the 19th International Conference on Mobile and Ubiquitous Systems Computing Networking and Services MobiQuitous 2022 which was held in Pittsburgh November 14 17 2022 The conference was held virtually due to the COVID 19 pandemic The 26 full and 2 short papers were carefully reviewed and selected from 95 submissions and present discussions They were organized in topical sections as follows Internet of Things IoT Security and Privacy Human centric sensing Drone applications and edge computing Wireless networks Mobile and human computer interactions Poster and demo sessions Technology for health
