Universal Zone Coder Software Release 2.0

NOTIFIER®
by Honeywell

Annunciator Control Systems

General

The U2C-256 Universal Zone Coder enables the Notifier intelligent fire alarm control panels (FACP's), network coded initiations (NCAs) and compatible legacy systems to provide positive non-interfering successive zone coded outputs. Up to 256 separate codes may be programmed to operate on the three coded outputs. Each output is used to code or pulse up to 5 Amps of Notification Appliance power.

Features

- Coded output from the U2C-256 can be fed to multiple output circuits.
- Up to 256 individually programmed codes.
- Three 5-Amp outputs.
- Programmable sounds of code (1 to 30 sounds).
- Up to four digits per sound.
- Up to 15 pulses per digit of code.
- Optional general alarm.
- Programmable code and sound(s) delay.
- Programmable pulse and digit pause times.
- Connects and communicates over panel EIA-485 interface.
- Programmable for California code.
- Weight 1.75 lbs.

Release 2.0 Features

- Secondary U2C user counting alarm operation activates U2C relays after specified number of alarms.
- Programmable address EIA-485 range (1-32).
- No code/counting selection for non-fire points.

Applications

The U2C-256 provides three outputs that supply unique coded information to certain output circuits, depending on the alarm initiation condition. This can be useful when employing coded outputs in floor-above, floor-below applications, or to provide various numbers of rounds for bell circuits and strobe or lamp circuits.

NOTE: Due to the nature of coded outputs, the U2C-256 is not compatible with notification devices which do not produce a steady or non-periodic sound. Periodic appliances that produce their own code (such as some codes available with electronic sounders) will not be compatible with the U2C-256. Refer to the U2C-256 Installation Manual for a list of compatible panels.

Construction & Operation

The U2C-256 provides three coded output relays, each rated for three amps at 30 VDC. These relays are controlled by a predefined program, and can be set to respond to general alarm conditions with the fire alarm system.

The U2C-256 and the CPU use the EIA-485 circuit for communication. When installed, the zone coder has a programmable address on the EIA-485 interface.

Assignment of points to zone codes within the U2C-25 is programmable in the NF52-3030, NF52-640, NF5-320 and NCA-2 (see programming manuals for details).
