Deanship in the Global South Oliver J.J. Seale, 2021-02-08

The university today is a postmodern, neo-liberal, competitive, boundary-less knowledge conglomerate, a far cry from its historical, traditional, classical, and collegial roots. There is a body of literature on deanship that points to its evolving nature in the contemporary academe, characterised by complexity and change. Balancing academic demands simultaneously with the requirements for effective performance, leadership and management lies at the heart of this very challenging bridging role. Nowadays, Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems. Deans nowadays are required to be more than collegial intellectual leaders. They are also meant to be fiscal and human resource experts, fundraisers, politicians, and diplomats.

Deanship in the Global South: Bridging Troubled Waters is about the deans' lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account. Their lack of preparation and inadequate support points to the need for a more strategic, integrated approach to leadership development within their critical bridging roles between the academe and administration.

Cyclones in Southern Africa Godwell Nhamo, David Chikodzi, 2021-09-28

Tropical cyclones in Southern Africa, also known as hurricanes or typhoons in other regions of the world, is a hot subject for academic research. This focus has been magnified by the need to consider tropical cyclones in the context of other global development agendas that includes the 2030 Agenda for Sustainable Development and its inseparable 17 Sustainable Development Goals (SDGs), the Paris Agreement, the Sendai Framework for Disaster Risk Reduction, and Habitat III's New Urban Agenda. The ambitious SDGs challenge global and community leaders to make sure development addresses the nexus among poverty, inequality, and employment creation, as well as care for the earth and its natural resources and biodiversity. The SDGs further present an agenda to eradicate hunger, bring quality education, and sustain water and sanitation. The infrastructure development, human settlements, sustainable consumption and production, climate change, biodiversity, and the ocean/blue economy agendas are also pitched. Lastly, the 2030 Agenda for Sustainable Development encourages partnerships on delivering various programmes and projects at all spatial levels. However, as tropical cyclones continue to make multiple

landfalls and ravage Southern Africa and other parts of the world the achievement of the 2030 Agenda for Sustainable Development is threatened To this end this book addresses this gap by documenting the implications of tropical cyclones drawing examples and case studies from recent tropical cyclones such as cyclone Idai and cyclone Kenneth that resulted in catastrophic impacts in 2019 The book comes as part of a series with three volumes The other volumes include Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe and Cyclones in Southern Africa Vol 2 Foundational and Fundamental Topics Given the foregoing the book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health
