Information, Knowledge, and Technology for Teaching and Research in Africa Dennis Ocholla, Omwoyo Bosire Onyancha, Aderonke Olaitan Adesina, 2024-08-27 This book focuses on information seeking and the knowledge economy for teaching and research in Africa The book first explores the evolution and current state of

information seeking behavior research demonstrating its importance in informing practice policy and design of information systems Despite the informal sector s substantial contributions to the national economy in Uganda there is a lack of studies delving into its information needs as well as an information gap in government NGOs and other stakeholders The book proposes that an appropriate information behavior model for information poor communities such as informal entrepreneurs must be grounded on oral traditions and indigenous knowledge and should be sensitive to poverty infrastructure and illiteracy The negative impact of the lack of financial literacy skills for women entrepreneurs is investigated and solutions for this problem are suggested including regular assessments of women entrepreneurs financial literacy skills and the introduction of training courses The role of academic libraries in universities library services for students with disabilities and accessibility of library services to students with disabilities is discussed and theoretical models for enhancing service in academic libraries are presented The book highlights the specific challenges and opportunities related to information literacy for secondary schools and concludes by examining the rapid changes in library and information science research in South Africa

Doctoral Education in South Africa Nico Cloete, Johann Mouton, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously

Achieving Full Realization and Mitigating the Challenges of the Internet of Things Odhiambo, Marcel Ohanga, Mwashita, Weston, 2022-03-04 As the internet of things market is booming several issues are delaying the full realization of the technology Currently business competitors are jockeying for a piece of the market meaning solutions from researchers that address these issues is crucial for internet of things technology developers Overpromising followed by underdelivering has been the current approach by many innovators and the mismatch results in losses in production orphaned technologies and frequent system failures Solutions that address
