PREFACE

- The output jack is an RJ45-terminated RJ 45 phone jack. The wires in each cable support all four connections.
- The built-in power jack is an automatically-charging and auto-reverse-charging inserted into the output jack. When not using the instrument, or when plugging it without connections, be sure the reverse-charging from the output jack so that the power will pass to instrument off.
- A single red LED indicator on the "off" power plugging in or unplugging the instrument cable.
- The battery cable indicator (BATT) will light briefly when a plug is inserted or removed from the output jack. This is normal and does not indicate a malfunction.
- The main red reverse-charging battery if the instrument is not used for an extended period of time in order the instrument possible damage due to

THE REACTION

- 1. VOLUME (Volume) Control**
Adjusts the overall output volume level.
* Make sure that the **MIN.** or **MAX.** or **"M"** display is appearing on the **display**.
- 2. BALANCE (Balance) Control**
Controls the balance of sound. In a stereo system, the left and right speakers will light. An **auto** (automatic) balance is further displayed when the left and right lights are on.
- 3. Equalizer Controls (See the Bar Graph)**
- LOW** Boosts or cuts the level of the low frequencies.
- MID** Boosts or cuts the level of the middle frequencies. The **AUT** control adjusts the center frequency of the boost/cut by the control.
- HIGH** Boosts or cuts the level of the high frequencies.
- 4. AMP Control**
Sets the center frequency of the range of frequencies affected by the **MID** equalizer control. The range is from 650 to 16 kHz.
- 5. MIC. VOL.**
Control the volume of the microphone (which is located inside the body). On the back of the power amplifier.
- 6. Setting the volume of the microphone**
a) Turn the **MIC. VOL.** control clockwise to the **MAX.** position.
b) Turn the **MIC. VOL.** control clockwise to the **MAX.** position.
c) Turn the **MIC. VOL.** control clockwise to the **MAX.** position.
- 7. MIC. TONE**
Adjusts the tone quality of the microphone. Rotate the knob to the **LOW** side to increase the bass and to the **HIGH** side to increase the treble.
- 8. PHASE switch for the MIC**
Using this switch will change the phase when the **MIC** signal is added to the guitar's tone. It can be effectively used to control feedback depending upon the device the

These are converted to numerical values: 100 and 1000 (10000) respectively. When the results ["Data Frame"] of these parameters are returned, each of the Data Frame gets given a "Time" column, which contains the time when the data was generated. The time is in the format of "HH:MM:SS".

1. *What is the first step in the design process?* The first step in the design process is to define the problem. This involves identifying the user's needs and requirements, and determining the goals of the design.
2. *What is the second step in the design process?* The second step in the design process is to generate concepts. This involves brainstorming ideas and exploring different design solutions.
3. *What is the third step in the design process?* The third step in the design process is to develop a design solution. This involves creating a detailed design that meets the user's needs and requirements.
4. *What is the fourth step in the design process?* The fourth step in the design process is to create a prototype. This involves building a physical or digital model of the design solution.
5. *What is the fifth step in the design process?* The fifth step in the design process is to evaluate the design. This involves testing the prototype and gathering feedback from users.
6. *What is the sixth step in the design process?* The sixth step in the design process is to refine the design. This involves making improvements to the design based on the feedback received.
7. *What is the seventh step in the design process?* The seventh step in the design process is to produce the final design. This involves creating the final product or service.
8. *What is the eighth step in the design process?* The eighth step in the design process is to implement the design. This involves putting the design into practice.
9. *What is the ninth step in the design process?* The ninth step in the design process is to monitor the design. This involves tracking the performance of the design and making adjustments as needed.
10. *What is the tenth step in the design process?* The tenth step in the design process is to evaluate the design. This involves assessing the overall success of the design process and the final product.
