Sources Of Power How People Make Decisions:

Sources of Power Gary A. Klein, 1999-02-18 Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims How do these individuals make the split second decisions that save lives Most studies of decision making based on artificial tasks assigned in laboratory settings view people as biased and unskilled Gary Klein is one of the developers of the naturalistic decision making approach which views people as inherently skilled and experienced It documents human strengths and capabilities that so far have been downplayed or ignored Since 1985 Klein has conducted fieldwork to find out how people tackle challenges in difficult nonroutine situations Sources of Power is based on observations of humans acting under such real life constraints as time pressure high stakes personal responsibility and shifting conditions The professionals studied include firefighters critical care nurses pilots nuclear power plant operators battle planners and chess masters Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid In addition to providing information that can be used by professionals in management psychology engineering and other fields the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks

Sources of Power Gary A. Klein, 1998-01 An overview of naturalistic decision making which views people as inherently skilled and experienced *Sources of Power, 20th Anniversary Edition* Gary A. Klein, 2017-09-15 As seen in Malcolm Gladwell's *Blink* the modern groundbreaking classic on effective decision making How people really make decisions by drawing on prior experience and using a combination of intuition and analysis We have all seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims How do these individuals make the split second decisions that save lives Most studies of decision making based on artificial tasks assigned in laboratory settings view people as biased and unskilled In this modern classic Gary A Klein proposes a naturalistic approach to decision making which views people as gaining experience that then enables them to use a combination of intuition and analysis to make decisions To illustrate this approach Klein tells stories of people from pilots to chess masters acting under such real life constraints as time pressure high stakes personal responsibility and shifting conditions Since its publication Sources of Power has been enormously influential The book has sold more than 50 000 copies has been translated into six languages has been cited in professional journals that range from Journal of Marketing Research to Journal of Nursing and is mentioned by Malcolm Gladwell in *Blink* Author Gary Klein has collaborated with Nobel laureate Daniel Kahneman and served on a team that redesigned the White House Situation Room to support more effective decision making The model of decision making Klein proposes in the book has been adopted in many fields including law enforcement training and petrochemical plant operation

Sources of Power Gary A. Klein, 1999 **Safety at the Sharp End** Rhona H. Flin, Paul O'Connor, Margaret Crichton, 2008 Safety at the Sharp End is a general guide to the theory and practice of non technical skills for safety It covers

the identification training and evaluation of non technical skills and has been written for use by individuals who are studying or training these skills on CRM and other safety or human factors courses The material is also suitable for undergraduate and post experience students studying human factors or industrial safety programmes *Disaster Operations and Decision Making* Roger C. Huder, 2013-01-22 The only book to combine emergency management principles with proven military concepts Good disaster plans do not guarantee a good response Any disaster plan rarely survives the first rain bands of a hurricane or the first tremors of an earthquake While developing plans is essential there must be systems in place to adapt these plans to the ever changing operational environment of a disaster Currently there is no set of standard disaster response principles to guide a community The National Incident Management System NIMS and the Incident Command System ICS provide the framework to implement operational decisions but they were never designed as operational concepts The military has developed just such concepts and many of them can be adapted for civilian use Disaster Operations and Decision Making adapts those military concepts and combines them with disaster lessons learned to create a new operational paradigm Emphasizing team building Emergency Operations Center operational systems and situational awareness the book details easily adopted methods All of these methods are designed to be incorporated into the NIMS and ICS framework to enhance a community's response to any type of disaster Disaster Operations and Decision Making is an essential resource for emergency managers fire chiefs law enforcement officers homeland security professionals public health officials and anyone else involved or interested in crisis management **Elite Sales Strategies** Anthony Iannarino, 2022-04-05

Using Social Science to Understand and Improve Wildland Fire Organizations Gregory Larson,2007 The wildland fire community has spent the past decade trying to understand and account for the role of human factors in wildland fire organizations Social research that is relevant to managing fire organizations can be found in disciplines such as social psychology management and communication However such research has been published primarily for scientific and business audiences and much of the fire community has not been exposed to it Here we have compiled and organized knowledge from a variety of social science disciplines so that it can be used to improve organizational practices related to firefighter and public safety to assess the effectiveness of safety campaigns and to improve firefighter safety trainings This annotated reading list summarizes approximately 270 books articles and online resources that address scientific and management concepts helpful for understanding the human side of fire management The first section Human Factors and Firefighting introduces readers to key workshops and writings that led to the recognition that human factors are prime ingredients of firefighter safety The second section Foundations for Understanding Organizations consists of social science research that provides a foundation for understanding organizational dynamics This section includes readings on decision making and sensemaking organizational culture identification and identity leadership and change organizational learning and teams and crews The third section Understanding Organizations in High Risk Contexts explores organizations that deal regularly with risk uncertainty and crisis This section includes readings on risk and uncertainty high reliability organizing and crisis communication The publication concludes with Internet resources available for those interested in the management of fire organizations

Intuition in Business Eugene Sadler-Smith,2023 This book explores the science behind intuitive decision making in business and shows how people s innate capacity for intuition can be nurtured and strengthened to maximize performance The clear and detailed explanations reveal how we can use intuition to navigate a world that is fast moving complex and uncertain

The Power of Intuition Gary Klein,2007-12-18 At times in our careers we ve all been aware of a gut feeling guiding our decisions Too often we dismiss these feelings as hunches and therefore untrustworthy But renowned researcher Gary Klein reveals that in fact 90 percent of the critical decisions we make is based on our intuition In his new book THE POWER OF INTUITION Klein shows that intuition far from being an innate sixth sense is a learnable and essential skill Based on interviews with senior executives who make important judgments swiftly as well as firefighters emergency medical staff soldiers and others who often face

decisions with immediate life and death implications Klein demonstrates that the expertise to recognize patterns and other cues that enable us intuitively to make the right decisions is a natural extension of experience Through a three tiered process called the Exceleration Program Klein provides readers with the tools they need to build the intuitive skills that will help them make tough choices spot potential problems manage uncertainty and size up situations quickly Klein also shows how to communicate such decisions more effectively coach others in the art of intuition and recognize and defend against an overdependence on information technology The first book to demystify the role of intuition in decision making THE POWER OF INTUITION is essential reading for those who wish to develop their intuition skills wherever they are in the organizational hierarchy Research Product - U.S. Army Research Institute for the Behavioral and Social Sciences ,2005
