South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

[An Ambulance on Safari](#) Melissa Diane Armstrong, 2020-10-22 During the apartheid era, thousands of South African political activists, militants and refugees fled arrest by crossing into neighbouring southern African countries. Although they had escaped political oppression, many required medical attention during their period of exile. *An Ambulance on Safari* describes the efforts of the African National Congress (ANC) to deliver emergency healthcare to South African exiles and, in the same stroke, to establish political legitimacy and foster anti-apartheid sentiment on an international

stage Banned in South Africa from 1960 to 1990 the ANC continued its operations underground in anticipation of eventual political victory styling itself as a government in waiting In 1977 it created its own Health Department which it presented as an alternative medical service and the nucleus of a post apartheid healthcare system By publicizing its own democratic policies as well as the racist practices of healthcare delivery in South Africa the Health Department won international attention for its cause and provoked widespread condemnation of the apartheid state While the global campaign was unfolding successfully the department's provision of healthcare on the ground was intermittent as patients confronted a fledgling medical system experiencing various growing pains Still the legacy of the department would be long as many medical professionals who joined the post apartheid Department of Health in South Africa had been trained in exile during the liberation struggle With careful attention to both the international publicity campaign and on the ground medical efforts An Ambulance on Safari reveals the intricate and significant political role of the ANC's Health Department and its influence on the anti apartheid movement
