Ceruzzi, 2003-04-08 From the first digital computer to the dot com crash a story of individuals institutions and the forces that led to a series of dramatic transformations This engaging history covers modern computing from the development of the first electronic digital computer through the dot com crash The author concentrates on five key moments of transition the transformation of the computer in the late 1940s from a specialized scientific instrument to a commercial product the emergence of small systems in the late 1960s the beginning of personal computing in the 1970s the spread of networking after 1985 and in a chapter written for this edition the period 1995 2001 The new material focuses on the Microsoft antitrust suit the rise and fall of the dot coms and the advent of open source software particularly Linux Within the chronological narrative the book traces several overlapping threads the evolution of the computer's internal design the effect of economic trends and the Cold War the long term role of IBM as a player and as a target for upstart entrepreneurs the growth of software from a hidden element to a major character in the story of computing and the recurring issue of the place of information and computing in a democratic society The focus is on the United States though Europe and Japan enter the story at crucial points on computing per se rather than on applications such as artificial intelligence and on systems that were sold commercially and installed in quantities **Worlds Gone Awry** John J. Han, C. Clark Triplett, Ashley G.

Anthony, 2018-08-22 Dystopian fiction captivates us by depicting future worlds at once eerily similar and shockingly foreign to our own This collection of new essays presents some of the most recent scholarship on a genre whose popularity has surged dramatically since the 1990s Contributors explore such novels as The Lord of the Flies The Heart Goes Last The Giver

and The Strain Trilogy as social critique revealing how they appeal to the same impulse as utopian fiction the desire for an idealized yet illusory society in which evil is purged and justice prevails **2001 between Kubrick and Clarke** Filippo Ulivieri, Simone Odino, 2023-04-13 The story of how 2001 A Space Odyssey came to be made is in many ways as epic as the events portrayed in the film itself and until now just as mysterious In 1964 with Dr Strangelove ready for release Stanley Kubrick was uncertain about what his next project would be and considered making a film dealing with several contemporary themes It was only when he encountered Arthur C Clarke that he decided to make a science fiction film Yet it took more than four years for 2001 A Space Odyssey to reach the screen a productive and creative odyssey that involved experimentation last minute rethinks strokes of genius quarrels ultimatums feats of will and mental breakdowns Drawing extensively from never before seen material including production documents and private correspondences 2001 between Kubrick and Clarke gives for the first time a complete account of the two authors creative collaboration one which casts lights on their on again off again relationship as well as revealing new information about the genesis production and reception of the first and most important film about space the origin of humankind and its destiny among the stars **Heritage Rare Books Auction #6025** , **The Anime Encyclopedia, 3rd Revised Edition** Jonathan Clements, Helen McCarthy, 2015-02-09 Impressive exhaustive labyrinthine and obsessive The Anime Encyclopedia is an astonishing piece of work Neil Gaiman Over one thousand new entries over four thousand updates over one million words This third edition of the landmark reference work has six additional years of information on Japanese animation its practitioners and products plus incisive thematic entries on anime history and culture With credits links cross references and content advisories for parents and libraries Jonathan Clements has been an editor of Manga Max and a contributing editor of Newtype USA Helen McCarthy was founding editor of Anime UK and editor of Manga Mania **Cult Film as a Guide to Life** I.Q. Hunter, 2016-09-08 Cult Film as a Guide to Life investigates the world and experience of cult films from well loved classics to the worst movies ever made Including comprehensive studies of cult phenomena such as trash films exploitation versions cult adaptations and case studies of movies as different as Showgirls Room 237 and The Lord of the G Strings this lively provocative and original book shows why cult films may just be the perfect guide to making sense of the contemporary world Using his expertise in two fields I Q Hunter also explores the important overlap between cult film and adaptation studies He argues that adaptation studies could learn a great deal from cult and fan studies about the importance of audiences emotional investment not only in texts but also in the relationships between them and how such bonds of caring are structured over time The book s emergent theme is cult film as lived experience With reference mostly to American cinema Hunter explores how cultists with their powerful emotional investment in films care for them over time and across numerous intertexts in relationships of memory nostalgia and anticipation **Beyond and Before, Updated and Expanded Edition** Paul Hegarty, Martin Halliwell, 2021-12-02 The original edition of Beyond and Before extends an understanding of progressive rock by providing a fuller definition of what

progressive rock is was and can be Called by Record Collector the most accomplished critical overview yet of progressive rock and one of their 2011 books of the year Beyond and Before moves away from the limited consensus that prog rock is exclusively English in origin and that it was destroyed by the advent of punk in 1976 Instead by tracing its multiple origins and complex transitions it argues for the integration of jazz and folk into progressive rock and the extension of prog in Kate Bush Radiohead Porcupine Tree and many more This 10 year anniversary revised edition continues to further unpack definitions of progressive rock and includes a brand new chapter focusing on post conceptual trends in the 2010s through to the contemporary moment The new edition discusses the complex creativity of progressive metal and folk in greater depth as well as new fusions of genre that move across global cultures and that rework the extended form and mission of progressive rock including in recent pop concept albums All chapters are revised to keep the process of rethinking progressive rock alive and vibrant as a hybrid open form

Kubrick's Total Cinema Philip Kuberski,2012-08-09 Whatever people think about Kubrick's work most would agree that there is something distinctive even unique about the films he made a coolness an intellectual clarity a critical edginess and finally an intractable ambiguity In an attempt to isolate the Kubrick difference this book treats Kubrick's

films to a conceptual and formal analysis rather than a biographical and chronological survey As Kubrick's cinema moves between the possibilities of human transcendence dramatized in 2001 A Space Odyssey and the dismal limitations of human nature exhibited in A Clockwork Orange the filmmaker's style de-realizes cinematic realism while paradoxically achieving an unprecedented frankness of vision and documentary and technical richness The result is a kind of vertigo the audience is made aware of both the de-realized and the realized nature of cinema As opposed to the usual studies providing a summary and commentary of individual films this will be the first to provide an analysis of the elements of Kubrick's total cinema

The Ex-Human Michael Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare science fiction authors have conjured apocalyptic scenarios of human extinction Can such gloomy fates help us make sense of our contemporary crises How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape What other possible futures do narratives of the end of humanity allow us to imagine Michael Bérubé explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of Homo sapiens In a lively conversational style he considers novels by writers including Ursula K Le Guin Margaret Atwood Liu Cixin Philip K Dick and Octavia Butler as well as films that feature hostile artificial intelligence such as 2001 A Space Odyssey Blade Runner and the Terminator and Matrix franchises Bérubé argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human Though framed by

the possibility of human extinction they are driven by a vision of the ex human a desire to imagine that another species is possible For all science fiction readers worried about the fate of humanity The Ex Human is an entertaining yet sobering account of how key novels and films envision the world without us
