The Discipline of Organizing Robert J. Glushko, 2013 **Exploring Contemporary Classification Practices** Jack Andersen, Joacim Hansson, 2025-07-15

The contributions in *Exploring Contemporary Classification Practices* analyse various aspects of classification and their importance to contemporary debates surrounding cultural heritage and information access. Specific focus is on systems of classification, media technologies and cultural institutions such as libraries, archives and museums and how they respond to challenges including classificatory bias, truth neutrality, institutional tradition and technological innovation. Raising awareness of classification practices in modern culture serves to emphasize how sorting things into categories is both an everyday accomplishment and a highly cultural and political activity with consequences for those who are classified and for those who classify. Throughout this book, classification is defined as the practice and activity of systematically ordering and categorizing entities to bring structure and understanding to diverse contexts. This book addresses several timely issues both in terms of theoretical advancement and empirical diversity. The scholarly discussion on the classification and organization of knowledge has developed with digital technologies from a bibliographic paradigm into something much wider as the need for metadata and classification has become critical for usability and legitimacy. This development has also led research on classification and knowledge organization to confront a new post-humanist reality with not only emerging varieties of information currents in society but also the development of new theoretical and methodological strands such as post-colonial and intersectional perspectives and digital humanities methodologies. In doing so, this book seeks to address critical questions for the archives, library and museum sectors concerning the organization of information. *Exploring Contemporary Classification Practices* will therefore be of interest to academics, researchers and practitioners with interests in library and information science, archives, cultural heritage and digital heritage.

Information and Knowledge Organisation in Digital Humanities Koraljka Golub, Ying-Hsang Liu, 2021-12-24. *Information and Knowledge Organisation* explores the role of knowledge organisation in the digital humanities. By focusing on how information is described, represented and organised in both research and practice, this work furthers the transdisciplinary nature of digital humanities. Including contributions from Asia, Australia, Europe, North America and the Middle East, the volume explores the potential uses of and challenges involved in applying the organisation of information and knowledge in the various areas of Digital Humanities. With a particular focus on the digital worlds of cultural heritage collections, the book also includes chapters that focus on machine learning, knowledge graphs, text analysis, text annotations and network analysis. Other topics covered include semantic technologies, conceptual schemas and data augmentation, digital scholarly editing, metadata creation, browsing visualisation and relevance ranking. Most importantly, perhaps the book provides a starting point for discussions about the impact of information and knowledge organisation and related tools on the methodologies used in the Digital Humanities field. *Information and Knowledge Organisation* is intended for use by researchers, students and professionals interested in the role information and knowledge organisation plays in the Digital Humanities. It will be essential reading for those working in library and information science, computer science and across the humanities. Deconstructing purity culture and reconstructing sexual ethics is essential to the survival of the Christian religion. When statistics tell us that approximately 90% of Americans have premarital sex and 87% of Australians believe premarital sex is morally acceptable, why do many Christian organizations still promote purity culture? It clearly does not work. If we are going to talk about healthy sexual expression, loving relationships, and how to navigate consent, we need to do so realistically. *Reconstructing Sexual Ethics* opens up deeply honest and authentic conversations around topics like masturbation, pornography, consent, rape, contraception, abortion, homophobia, and queer affirmation, exploring how the author has evolved in these and many other areas, and challenging the church to do the same. Part memoir and part manifesto, this book reframes Christian sexual ethics in profoundly important ways, elevating the love and grace of God above Evangelical purity culture. It has the power to radically transform conversations around various aspects of our sexuality within the Christian religion and broader society.

Endorsements: *Reconstructing Sexual Ethics* is a courageous, compassionate, and deeply needed work. With honesty, theological depth, and a commitment to love and justice, Eady Jay dismantles harmful purity culture teachings and charts a healthier, grace-filled path forward. This book gives voice to those who have long wrestled with shame and silence, and it offers a vision of sexuality that is life-giving, liberating, and faithful. Rev. Brandan Robertson, author of *Queer Christian: Reclaiming the Bible, Our Faith, and Our Place at the Table*. Eady Jay goes there. She transparently and bravely deconstructs and breaks down the oppressive forces of puritanical culture that she was raised with and that are still embedded in mainstream culture today. You may or may not agree with everything she has written, but we are all better for it. Why? Because exploring the relationship between faith and sexuality serves to liberate us from centuries of our joy being suppressed and our sexuality being oppressed. She writes with abundant grace, keen insights, and a clear heart for Christ, aiming to reform our relationship with our bodies, one another, and God. I have no doubt that her words will illuminate others on a similar journey. Chantal McKinney, author of *Following Jesus Beyond Church Walls*. This is a book I have always wanted to write, and Eady Jay has done it better. Gripping, accessible, and humble in its wrestling with the Scripture tradition and ordinary life, her story welcomes readers across the spectrum of faith and sexuality to find inspiration, challenge, and even affirming echoes of their own experiences. Vulnerability and courage write themselves across every page in the unanswered questions, honest explorations, and uncertain steps that define a journey we all face in learning how to more fully embody the truth we see about God in our diverse expressions of sexuality. Dr. Kevin Jenson, theologian and author of *Sacred, Not Sinful: A New Christian Ethic*. *Reconstructing Sexual Ethics* is a refreshingly frank yet deeply pastoral reimaging of Christian sexual ethics. It affirms the essential dynamics of queerness, gender equity, and consent, offering clarity and compassion for those seeking a more just and loving vision of sexuality. Alongside other voices that deepen intersectionality and expand its scope, it is an important and thought-provoking resource that I highly recommend. Jamie Arpin Ricci, founder of The Rainbow Well.

Eady Jay has given us something remarkable in *Reconstructing Sexual Ethics* With honesty and courage she speaks directly to those who have deconstructed some or all of their faith weaving together deeply personal stories with a thoughtful and robust theological vision The result is an invitation into a sexual ethic free from the harmful rhetoric of purity culture and grounded instead in freedom dignity and grace Jessica Vanderwyngaard Producer of *I Survived I Kissed Dating Goodbye* and the *Where Do We Go From Here* Podcast

Everyday Adventures with Unruly Data Melanie Feinberg, 2022-10-11 Paired informal and scholarly essays show how everyday events reveal fundamental concepts of data including its creation aggregation management and use Whether questioning numbers on a scale laughing at a misspelling of one's name or finding ourselves confused in a foreign supermarket we are engaging with data The only way to handle data responsibly says Melanie Feinberg in this incisive work

is to take into account its human character Though the data she discusses may seem familiar close scrutiny shows it to be ambiguous complicated and uncertain unruly Drawing on the tools of information science she uses everyday events such as deciding between Blender A and Blender B on Amazon to demonstrate a practical critical and generative mode of thinking about data its creation management aggregation and use Each chapter pairs a self contained main essay an adventure with a scholarly companion essay the reflection The adventure begins with an anecdote visiting the library running out of butter cooking rice on a different stove Feinberg argues that to understand the power and pitfalls of data science we must attend to the data itself not merely the algorithms that manipulate it As she reflects on the implications of commonplace events Feinberg explicates fundamental concepts of data that reveal the many tiny design decisions which may not even seem like design at all that shape how data comes to be Through the themes of serendipity objectivity equivalence interoperability taxonomy labels and locality she illuminates the surprisingly pervasive role of data in our daily thoughts and lives
