stones weighing up to four tons dragged 140 miles across England to build Stonehenge Who and why were pyramids built on the equatorial band circling the earth What does modern DNA analysis tell us of mankind s heritage Are we to believe the Ancient Alien Theory Along the way Willis examines human history and searches for the sparks of contemporary society It also includes a helpful bibliography and an extensive index adding to its usefulness

Lost Ancient Technology Of Peru And Bolivia Brien Foerster,2012-11-30 Ancient Peru and Bolivia like Egypt contain enigmas and mysteries especially in stone which most conventional scholarship can t explain Rather than simply being the exclusively the works of cultures such as the Inca there are many megalithic wonders which defy both the conventional time lines and known levels of technology attributed to the ancient people of South America The most glaring example is most likely Puma Punku near the shore of Lake Titicaca in Bolivia which hints at not only being several thousand years old but also seems to have been achieved using what we would call high level machine technology There are also many sites in Peru and especially near the city of Cusco that also show the hall marks of having been made by cultures using technology supposedly not known by cultures such as the Inca A massive collection of photographic and detailed analysis is contained in this book as well as on site observations by leading engineers

Boards and Cords Tyler G. O'Brien,2024-02-14 Archaeological evidence and ethnohistoric accounts document ancient groups from around the world intentionally binding their infants head in one of two manners Soon after birth they would either strap hard flat devices e.g boards to both the front and back of the infant's head or wrap tight bandages e.g cords around the head The result is a permanently modified adult head In *Boards and Cords* bioarchaeologist and skeletal biologist Tyler G O'Brien explores the long practiced biocultural phenomenon of intentional cranial modification via an anthropological lens An introductory chapter offers briefly summarized answers to main questions often asked about cranial modification The book then covers normal cranial growth and development to set the groundwork for understanding better how scientists interpret abnormally shaped pathological skulls from those that are modified What follows is a thorough exploration of

archaeological evidence and ethnohistoric accounts beginning with the earliest modified skulls found at sites dating back 20 000 years and continuing to today s modern day use of the cranial orthotic helmet as corrective treatment for infants with deformational plagiocephaly This book is a valuable multidisciplinary tool for the student and scholar who wants to read a global account of intentional cranial modification
