The Future Of The American Negro:

The Future of the American Negro Booker T. Washington, 1899 Aims to put in more definite permanent form the ideas regarding the negro his future which the author expressed many times on the public platform through the press magazines

The Future of the American Negro Booker T. Washington, 1950 *FUTURE OF THE AMERICAN NEGRO* BOOKER T. WASHINGTON, 2018 **The Future of the American Negro** Booker T. Washington, 2013-07-25 In this volume I

shall not attempt to give the origin and history of the Negro race either in Africa or in America My attempt is to deal only with conditions that now exist and bear a relation to the Negro in America and that are likely to exist in the future In discussing the Negro it is always to be borne in mind that unlike all the other inhabitants of America he came here without his own consent in fact was compelled to leave his own country and become a part of another through physical force It should also be borne in mind in our efforts to change and improve the present condition of the Negro that we are dealing with a race which had little necessity to labour in its native country After being brought to America the Negroes were forced to labour for about 250 years under circumstances which were calculated not to inspire them with love and respect for labour This constitutes a part of the reason why I insist that it is necessary to emphasise the matter of industrial education as a means of giving the black man the foundation of a civilisation upon which he will grow and prosper When I speak of industrial education however I wish it always understood that I mean as did General Armstrong the founder of the Hampton Institute for thorough academic and religious training to go side by side with industrial training Mere training of the hand without the culture of brain and heart would mean little *The Future of the American Negro* Booker

Washington, 2017-08-26 *The Future of the American Negro* a book written in 1899 by American educator Booker T Washington set forth his ideas regarding the history of enslaved and freed African American people and their need for education to advance themselves In the beginning of the book the author mentions the term industrial education Washington describes this term as meaning learning the necessities to become a valuable member of society as well and being able to apply this knowledge to industrial business He believes that even though slavery is illegal the freed African Americans are still enslaved to the white people Those who are freed cannot be members of society because they are not given the same opportunities As the book continues Booker T Washington writes that in order to understand the stress he applies to industrial education the reader must review the condition of affairs at the present time in the Southern States He provides the information that the North and South are linked even though they were once at war If the North cannot provide education then the South will not provide it Washington also states that the African Americans are not superior but that they are definitely not inferior to the white people Slaves have had a hard time throughout their life in the United States Their strength knowledge and perseverance has been tested by the white people that have run their lives for the longest time Booker T Washington asks why should African Americans have to prove themselves over and over when they have been

proving themselves since they entered the country The author also reminds them that An individual cannot succeed unless that individual has a great amount of faith himself African Americans can have all the faith they want but Washington argues that knowledge is needed to become useful members of society Blacks have worked hard but will have to understand what they are working for

Washington, 2019-11-21 In *The Future of the American Negro* Booker T Washington presents a compelling treatise on the prospects and challenges facing African Americans in the post Reconstruction era Through a blend of autobiographical reflection and social analysis Washington advocates for a pragmatic approach to racial uplift that emphasizes vocational training and self reliance over immediate political agitation His prose is characterized by a directness
