[The Origin of Empire](#) David Potter, 2019-06-03 Beginning with the Roman army's first foray beyond its borders and concluding with the death of Hadrian in 138 CE this panoramic history of the early Roman Empire recounts the wars leaders and social transformations that lay the foundations of imperial success Between 264 BCE when the Roman army crossed into Sicily and the death of Hadrian nearly three hundred years later Rome became one of the most successful multicultural empires in history In this vivid guide to a fascinating period David Potter explores the transformations that occurred along the way as Rome went from republic to mercenary state to bureaucratic empire from that initial step across the Straits of Messina to the peak of territorial expansion Rome was shaped by endless political and diplomatic jockeying As other Italian city states relinquished sovereignty in exchange for an ironclad guarantee of protection Rome did not simply dominate its potential rivals it absorbed them by selectively offering citizenship and constructing a tiered membership scheme that allowed Roman citizens to maintain political control without excluding noncitizens from the state's success Potter attributes the empire's ethnic harmony to its relative openness This imperial policy adapted and persisted over centuries of internal discord The fall of the republican aristocracy led to the growth of mercenary armies and to the creation of a privatized and militarized state that reached full expression under Julius Caesar Subsequently Augustus built a mighty bureaucracy which went on to manage an empire ruled by a series of inattentive intemperate and bullying chief executives As contemporary parallels become hard to ignore *The Origin of Empire* makes clear that the Romans still have much to teach us about power governance and leadership

The History of Israel, Volume 1 Georg Heinrich Ewald,2004-09-27 *An Epic Tale of the People of the Covenant (The origin of Christianity)* Atsushi Murakami,2021-02-26 Last year 2019 I published the 6th edition of my book The Origin of Christianity with the subtitle An Epic Tale of the People of the Covenant paying attention to the fact that Christianity was born from the church movement that had occurred in the process of the people of the Covenant scattered all over the world after they had migrated from the Fertile Crescent at the mouths of the Tigris and Euphrates rivers to the Promised Land Canaan However later it became clear that the Ephraim and Manasseh only who possess the genetic characteristics of Paleo Mongoloid among the twelve tribes of Israel played an important role not only in the conquest of Canaan but also in the

eastern transmission of Christianity Thus this time I deliver this 7th edition with the main title of An Epic Tale of the People of the Covenant In creating the augmented part of the 7th edition I got many hints from the blog of Protestant Bible commentator Mr Arimasa Kubo who was the first pastor of the Ikebukuro Nishi Church and used them as the reference December 2020 Atsushi Murakami *A Treatise on the Origin of Expiatory Sacrifice* George Stanley Faber,1827 *Science and Technology in World History, Volume 4* David Deming,2016-04-13 The history of science is a story of human discovery intertwined with religion philosophy economics and technology The fourth in a series this book covers the beginnings of the modern world when 16th century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable Science emerged in 17th century Europe as scholars subordinated reason to empiricism Inspired by the example of physics men like Robert Boyle began the process of changing alchemy into the exact science of chemistry During the 18th century European society became more secular and tolerant Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies As the Industrial Revolution fundamentally transformed the world by increasing productivity people became more affluent better educated and urbanized and the world entered an era of unprecedented prosperity and progress
