The Emperors New English Edition:

The Emperor's New Clothes Hans Christian Andersen, 2015-01-01 A playfully illustrated version of the tale about misguided adults and an innocent boy who boldly tells the truth *The Emperor's New Mathematics* Catherine Jami, 2011-12-01 In 1644 the Qing dynasty seized power in China Its Manchu elite were at first seen by most of their subjects as foreigners from beyond the Great Wall and the consolidation of Qing rule presented significant cultural and political problems as well as military challenges It was the Kangxi emperor r 1662 1722 who set the dynasty on a firm footing and one of his main stratagems to achieve this was the appropriation for imperial purposes of the scientific knowledge brought to China by the Jesuit mission 1582 1773 For almost two centuries the Jesuits put the sciences in the service of evangelization teaching and practising what came to be known as Western learning among Chinese scholars many of whom took an active interest in it After coming to the throne as a teenager Kangxi began his life long intervention in mathematical and scientific matters when he forced a return to the use of Western methods in official astronomy In middle life he studied astronomy musical theory and mathematics with Jesuits as his teachers In his last years he sponsored a great compilation covering these three disciplines and set several of his sons to work on this project All of this activity formed a vital part of his plan to establish Manchu authority over the Chinese This book explains why Kangxi made the sciences a tool for laying the foundations of empire and to show how as part of this process mathematics was reconstructed as a branch of imperial learning The Emperor's New Clothes Kathryn Flannery, 2010-11-23 Since the Renaissance what has been considered the best style of writing has always been connected with the dominant cultural agenda of the time In this book Kathryn Flannery offers a demystifying perspective on theorists who have argued for an essential distinction between content and style and focuses on the importance of understanding written prose style as a cultural asset She addresses the development of prose criticism the evolution of English teaching the history of Francis Bacon and Richard Hooker s writing and a modern discourse on stylistics **Catalog of Copyright Entries. Barber,Frances Berdan,1998-10 Russell J Barber and Frances F Berdan have created the ultimate guide for anyone doing cross cultural and or document driven research Presenting the essentials of primary source methodology The

Emperor's Mirror includes nine chapters on paleography, calendrics, source and quantitative analysis and the visual interpretation of artifacts such as pictographs, illustrations and maps. As an introduction to ethnohistory, this book clearly defines terminology and provides practical and accessible examples, effectively integrating the concerns of historians and anthropologists as well as addressing the needs of anyone using primary sources for research in any academic field. A leading theme throughout the book is the importance of a researcher's awareness of the inherent biases of documents while doing research on another culture. Documents are the result of people interpreting reality through the filter of their own experience, personality and culture. Barber and Berdan's reality mediation model shows students how to analyze documents to detect the implicit biases or subtexts inherent in primary source materials. Students and scholars working with primary sources will particularly appreciate the case studies that Barber and Berdan use to illustrate the practical implications of using each methodology. These case studies not only apply method to actual research but also are fascinating in their own right; they range from a discussion of the debate over Tupinamba cannibalism to the illustration of Nahuatl, Spanish and hybrid place names of Tlaxcala, Mexico.

Simon Burrows, 2018-08-09. This is a rich and path-breaking comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers the Société Typographique de Neuchâtel (STN) and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. In the process, it recasts our understanding of late 18th century print culture and the contours of the enlightenment. The fruit of a widely acclaimed five-year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the structure and practices of the European book trade. The STN database is now recognised as a cutting-edge digital project of global significance. Robert Darnton has called it a prodigious accomplishment and a joy to use, while Jeremy Popkin adds, 'No one working in the field of French Enlightenment studies can afford to ignore the rich mine of data that Simon Burrows and his collaborators have made accessible in an eminently usable form, and the new possibilities it opens up for scholars.' The *French Book Trade in Enlightenment Europe I and II* offer a roadmap of that data and what it can show us.
