Easternization of the West Colin Campbell, 2015-11-17 In this provocative and groundbreaking book Colin Campbell shows that the civilization of the West is undergoing a revolutionary process of change one in which features that have characterized the West for two thousand years are in the process of being marginalized to be replaced by those more often associated with the civilizations of the East Moving far beyond popular trends Campbell assembles a powerful range of evidence to show how Easternization has been building throughout the last century especially since the 1960s Campbell demonstrates how it was largely in the 1960s that new interpretations in theology political thought and science were widely adopted by a new generation of young culture carriers This highly original and wide ranging book advances a thesis that will be of interest to scholars in many disciplines in the humanities and social sciences **Beyond Law in Context** David Nelken, 2017-09-08 This intriguing collection of essays by David Nelken examines the relationship between law society and social theory and the various ideas social theorists have had about the actual and ideal fit between law and its social context

It also asks how far it is possible to get beyond this mainstream paradigm The value of social theorising for studying law is illustrated by specific developments in substantive areas such as housing law tort law the law of evidence and criminal law Throughout the chapters the focus is on the following questions What is gained and what may be lost by putting law in context What attempts have been made to go beyond this approach What are their necessary limits Can law be seen as anything other than in some way both separate from and relating to the social The distinctiveness of this approach lies in its effort to keep in tension two claims Firstly that social theorising about legal practices is vitally important for understanding the connections between legal and social structures and revealing what law means and does for and to various social actors The second point is that it does not follow that what we learn in this way can be assumed to be necessarily relevant to re shaping legal practices without further argument that pays heed to law s specificity *Biographical Memoirs of Fellows, VII* Ron Johnston, 2008-12-25 Seventeen obituaries of recently deceased Fellows of the British Academy Shackleton Bailey James Barr William Beasley Lord Blake Julian Budden Lord Bullock Robert Carson Laurence Cohen Charles Feinstein Henry Gifford Peter Holt Emrys Jones Robert Megarry Edward Oates Maurice Wiles Brian Woledge Austin Woolrych **Globalization: Culture and identity** Roland Robertson, Kathleen E. White, 2003 **The Manager's Guide to Systems Practice** Frank Stowell, Christine Welch, 2012-05-24 This book is an ideal resource on the subject of systems practice for busy managers whose time is scarce It provides a rapid introduction to straightforward yet powerful ideas that enable users to address real world problems Systems theory and practice is predominantly a framework for thinking about the World in which holistic views are maintained In this respect it contrasts with some familiar techniques of management science in which problem situations are broken down into their constituent parts with resultant loss of coherence **Humanities in the Primary School** R. J. Campbell, Vivienne Little, 1989 This work examines the principles on which a curriculum in primary school humanities might be based The political and cultural context of curriculum development in the humanities is not avoided and many of the contributions to this book deal with children s encounters with controversial issues
