Pedagogies of the Imagination Timothy Leonard, Peter Willis, 2008-06-11 I have long admired the mythopoetic tradition in curriculum studies That admiration followed from my experience as a high school teacher of English in a wealthy suburb of New York City at the end of the 1960s A dream job I taught four classes of 15-20 students during a nine period day in a dream suburb where I could afford to reside only by taking a room in a retired teacher's house many of these often Ivy League bound students had everything but meaningful lives This middle class Midwestern young teacher was flabbergasted In one sense my academic life has been devoted to understanding that searing experience Matters of meaning seemed paramount in the curriculum field to which Paul Klohr introduced me at Ohio State Klohr assigned me the work of curriculum theorists such as James B Macdonald Like Timothy Leonard who also studied with Klohr at Ohio State and Peter Willis Macdonald 1995 understood that school reform was part of a broader cultural and political crisis in which meaning is but one casualty In the mythopoetic tradition in curriculum studies scholars labor to understand this crisis and the conditions for the reconstruction of meaning in our time in our schools

The Spirit of the Waldorf School Rudolf Steiner, 1995-09 9 lectures September 15-22 1920 and October 15-16 1923 CW 302a Speaking to the teachers at the first Waldorf school in Stuttgart Steiner asserts that the unfortunate presence of dishonesty and alienation in society today cannot be addressed without a completely renewed and holistic education He states fact that successful teaching requires a living synthesis of the spiritual gymnast the ensouled rhetorician and the intellectual professor Of these the formative effect of the rhetorician's cultivation of artistic speech is the most important It's impossible for true teaching to be boring declares Steiner and he offers several examples of how teachers can observe a natural phenomenon so intimately that its creative life can flow into the children through a teacher's own words in the classroom He also describes in spiritual scientific depth how the actions of teachers directly affect the physiological chemistry of their students From this perspective education is really therapy transformed to a higher level and should be seen as closely related to the healing arts Steiner also shows how the perception of hidden relationships between education and the processes of human development can kindle a heartfelt enthusiasm and a sense of responsibility in teachers for the far reaching health effects that educational activities can produce German source Erziehung und Unterricht

Miller, Kelli Nigh, 2017-03-01 Learning often begins with

an experience in the body Our body can tighten or feel expansive depending on different learning contexts This experience of learning in the body is crucial to holistic education This book explores embodied learning from several perspectives This first section explores how psychology can inform us about embodied learning for example the work of Carl Jung and Wilhelm Reich devoted much of their thinking to how energy manifests itself in the body Meditation and movement are also examined as ways of embodied learning for example Dalcroze a form of movement education is presented within the context of whole person education The book also presents schools where embodied learning is nurtured Waldorf education is discussed as well as a public school in Toronto where the body is central to holistic education The book also presents visions of embodied learning John Miller presents a holistic vision of teacher education and Tobin Hart who has written extensively in this field writes about the embodied mind Embodied learning is an emerging area of inquiry in holistic education and this book presents a variety of perspectives and practices that should be helpful to both scholars and practitioners Philosophy of Education in Action David W.
