Southern Waters The Limits To Abundance:

Southern Waters Craig E. Colten, 2014-10-13 Water has dominated images of the South throughout history from Hernando de Soto's 1541 crossing of the Mississippi to tragic scenes of flooding throughout the Gulf South after Hurricane Katrina. But these images tell only half the story as urban industrial and population growth create unprecedented demands on water in the South; the problems of pollution and water shortages grow ever more urgent. In *Southern Waters: The Limits to Abundance*, Craig E. Colten addresses how the South in an environment fraught with uncertainty can navigate the twin risks of too much water and not enough. From the arrival of the first European settlers, the South's inhabitants have pursued a course of maximum exploitation and control of the area's plentiful waters, investing widely in wetland drainage and massive flood control projects. Disputes over southern waterways go back nearly as far; obstruction of fish migration by mill dams prompted new policies to protect aquatic life as early as the colonial era. Colten argues that such conflicts, which have heightened dramatically since the explosive urbanization of the mid-twentieth century, will only become more frequent and intense, making the shift toward sustainable use a national imperative. In tracing the evolving uses and abuses of southern waters, Colten offers crucial insights into the complex historical geography of water throughout the region. A masterful analysis of the ways in which past generations harnessed and consumed water, *Southern Waters* also stands as a guide to adapting our water usage to cope with the looming shortage of this once abundant resource. Ecology of the Southern California Bight Murray D. Dailey, 2023-11-15 Here is a benchmark study of one significant stretch of the Pacific Ocean, the Southern California Bight. Extending from Point Conception to the Mexican border and out to the 200-mile limit, these waters have never before been investigated in such detail from so many points of view by such an eminent group of scientists. The twenty-five expert contributors summarize everything known about the physical, chemical, geological, and biological characteristics of the area in individual chapters; the volume concludes with a synthesis of the information presented. In addition, chapters are devoted to the influence of humans on the marine environment and to the various laws and governmental agencies concerned with protecting it. Because Southern California is so heavily populated and because the ocean is a major recreational area for its people, the information in this unique volume will be invaluable for the region's planners and decisionmakers as well as for all those who study the globe's marine resources and ecology. Here is a benchmark study of one significant stretch of the Pacific Ocean, the Southern California Bight. Extending from Point Conception to the Mexican border and out to the 200-mile limit, these waters have never before been investigated in such detail. Fishery Bulletin, 1974

Biological Invasions in Marine Ecosystems Gil Rilov, Jeffrey A. Crooks, 2008-11-12. Biological invasions are considered to be one of the greatest threats to the integrity of most ecosystems on earth. This volume explores the current state of marine bioinvasions, which have been growing at an exponential rate over recent decades. Focusing on the ecological aspects of biological invasions, it elucidates the different stages of an invasion process, starting with uptake and transport through inoculation, establishment, and finally integration into new ecosystems. Basic ecological concepts, all in the context of bioinvasions, are covered, such as propagule pressure, species interactions, phenotypic plasticity, and the importance of biodiversity. The authors approach bioinvasions as hazards to the integrity of natural communities, but also as a tool for better understanding fundamental ecological processes. Important aspects of managing marine bioinvasions are also discussed, as are many informative case studies from around the world.
