Discourses of Authenticity on YouTube

Giorgia Riboni, 2020-08-25T00:00:00+02:00 This book explores the discourse of authenticity on the popular social media platform YouTube. It investigates how popular users negotiate their identity and discursively portray themselves as authentic in their videos. In so doing, it adds to the development of new perspectives on social media communication and offers an outlook on issues concerning the complexities of contemporary identity practices. Starting from the premise that authenticity is a discursive construction, the study adopts a linguistics-based approach and relies on a hybrid methodological toolkit that draws on the analytical tools provided by Social Media Critical Discourse Studies (SM-CDS), a newly introduced framework comprised of different but interconnected levels of description. The volume presents three case studies which investigate the discursive and rhetorical strategies used by well-known users in order to come across as authentic. Videos produced by popular content creators belonging to different communities of practice (scientists, stay-at-home mothers, and makeup artists) are explored. The analysis reveals that they share a common set of identity characteristics: a common core of authentic traits. Famous YouTubers conventionally display to discursively depict themselves as genuine and credible.

TESOL Student Teacher Discourse Elaine Riordan, 2018-05-15 This book explores the use of online and face-to-face interactions in language teacher education (LTE) by assessing the formation and practices of a community of practice (CoP) and evaluating the roles discussions between student teachers and a peer tutor can play in terms of identity formation, articulating narratives, reflective practices, and maintaining affective relationships. The specific context within which this is embedded is a Teaching English to Speakers of Other Languages (TESOL) programme, often known as English Language Teaching (ELT), at a third-level Irish institution. The data drawn on come from student teachers on a master's (MA) programme who interacted with a peer tutor (the researcher) via a number of modes: face-to-face and online. The approach to data analysis is a corpus-based discourse-analytical one which examines the linguistic features of student teacher and peer tutor talk, the features of CoP practices in the discourse, and how different modes of communication shape the nature of this discourse.
