The Discovery Of Slowness:

The Discovery of Slowness Sten Nadolny, 1997-06-01 In *The Discovery of Slowness* German novelist Sten Nadolny recounts the life of the nineteenth century British explorer Sir John Franklin 1786 1847 The reader follows Franklin's development from awkward schoolboy and ridiculed teenager to expedition leader governor of Tasmania and icon of adventure Everyone with whom he came into contact sensed that he was a rare man one who was out of his time and who moved to a different grander beat That beat eventually led Franklin to sail once more on his final fateful voyage into the Arctic in search of the Northwest Passage *The Discovery of Slowness* is both a riveting account of a remarkable and varied life and a profound and thought provoking meditation on time *The discovery of slowness* Sten Nadolny, 1987 **On Slowness** Lutz Koepnick, 2014-10-07 Speed is an obvious facet of contemporary society whereas slowness has often been dismissed as conservative and antimodern Challenging a long tradition of thought Lutz Koepnick instead proposes to understand slowness as a strategy of the contemporary a decidedly modern practice that gazes firmly at and into the present's velocity As he engages with late twentieth and early twenty first century art photography video film and literature Koepnick explores slowness as a critical medium to intensify our temporal and spatial experiences Slowness helps us register the multiple layers of time history and motion that constitute our present It offers a timely and untimely mode of aesthetic perception and representation that emphasizes the openness of the future and undermines any conception of the present as a mere replay of the past Discussing the photography and art of Janet Cardiff Olafur Eliasson Hiroshi Sugimoto and Michael Wesely the films of Peter Weir and Tom Tykwer the video installations of Douglas Gordon Willie Doherty and Bill Viola and the fiction of Don DeLillo Koepnick shows how slowness can carve out spaces within processes of acceleration that allow us to reflect on alternate temporalities and durations **Understanding Media and Society in the Age of Digitalisation** Dennis Nguyen, Ivonne Dekker, Sergül Nguyen, 2020-06-27 This book provides a selection of international perspectives in the interdisciplinary field of media and communications research with emphasis placed on methodological approaches and new research domains It includes critical reflections on how to conduct research on digital media culture especially concerning the potentials and limitations for mixed methods research and online research strategies as well as a series of hands on case studies These range from digital fan cultures through environmental communication news media digital politics during conflicts and crises to digital media psychology and the emerging field of medical humanities Diverse in its examples and angles the book provides a rich snippet of how media research practices are determined by practical factors and research interests **Real IELTS Academic Reading Tests eBook Vol. 1** IELTSXpress.com, This comprehensive IELTS Academic Reading eBook includes 20 full length tests based on actual exams reported between 2023 and 2025 from countries like India Canada Australia UAE Bangladesh and more Also included Answer keys Band score conversion chart Printable IELTS answer sheet template Perfect for self study learners repeat test takers and anyone aiming for a band score of 6.5 to 8 in the IELTS

Nadolny, 1987 **Optics of Semiconductors and Their Nanostructures** Heinz Kalt, Michael Hetterich, 2013-04-09 In recent years the field of semiconductor optics has been pushed to several extremes. The size of semiconductor structures has shrunk to dimensions of a few nanometers; the semiconductor light interaction is studied on timescales as fast as a few femtoseconds and transport properties on a length scale far below the wavelength of light have been revealed. These advances were driven by rapid improvements in both semiconductor and optical technologies and were further facilitated by progress in the theoretical description of optical excitations in semiconductors. This book, written by leading experts in the field, provides an up-to-date introduction to the optics of semiconductors and their nanostructures so as to help the reader understand these exciting new developments. It also discusses recently established applications such as blue light emitters as well as the quest for future applications in areas such as spintronics, quantum information processing and third-generation solar cells.

Downtime Mark Goble, 2025-06-17 Slow motion has become perhaps the least special effect in film and media, a stylistic technique for showing violence, dream sequences and flashbacks or other experiences outside ordinary time. We see so much slow motion on our screens today that we can look past its history and forget how rare it was before the 1960s when films such as *The Wild Bunch*, *Bonnie and Clyde* and *2001: A Space Odyssey* helped it explode in popularity at a moment of cultural change and social upheaval. This ambitious book tells the story of slow motion, tracing a broader fascination with the uneven speeds of modern life and our ability to comprehend them. *Downtime* explores the history and aesthetics of slow motion from its origins in early film to its prominence today. Mark Goble argues that the effect's sudden visibility after 1968 registers experience of modernity as a period of perpetual acceleration that somehow makes even the smallest intervals of time feel endless. Ranging across literature, art and cinema, including novels by William Faulkner, Don DeLillo and W.G. Sebald as well as Robert Smithson's *Spiral Jetty* and Julie Dash's *Daughters of the Dust*, he describes how writers and filmmakers depict the velocities and durations of contemporary life. Goble reveals the twentieth century and its aftermath as figured in slow motion, rushing past and deliriously delayed, everything going fast and slow at once. *Downtime* is about time and its technologies in an accelerated world that can advance only in slow motion.

RISINGTIDE FALLINGSTAR Philip Hoare, 2018-04-02 Every day is an anxiety in my ways of getting to the water. I've become so attuned to it, so scared of it, so in love with it that sometimes I can only think by the sea. It is the only place I feel at home. Many of us visit the sea. Admire it. Even profess to love it. But very few of us live it. Philip Hoare does. He swims in the sea every day, either off the coast of his native Southampton or his adopted Cape Cod. He watches its daily and seasonal changes. He collects and communes with the wrack, both dead and never living, that it throws up on the shingle. He thinks with it, through the sea. All of which should prepare readers. *RISINGTIDE FALLINGSTAR* is no ordinary book. It mounts no straight-ahead argument. It hews to no single genre. Instead, like the sea itself, it moves, flows, absorbs, transforms. In its pages we find passages of beautiful nature and

travel writing lyrical memoir seams of American and English history and much more We find Thoreau and Melville Bowie and Byron John Waters and Virginia Woolf all linked through a certain refusal to be contained to be strictly defined an openness to discovery and change Running throughout is an air of elegy a reminder that the sea is an ending a repository of lost ships lost people lost ways of being It is where we came from for Hoare it is where he is going Every swim is a little death Hoare writes but it is also a reminder that you are alive Few books have ever made that knife s edge so palpable Read
