

11. The differentiation between 'evaluate' and 'critically evaluate' can be explained as follows:
- 11.1 When 'evaluate' is used, candidates are expected to respond in either a positive/negative manner or take a neutral (positive and negative) stance, e.g. **Positive:** 'CIDA eliminates time and costs spent✓ on lengthy civil court proceedings.'✓
 - 11.2 When 'critically evaluate' is used, candidates are expected to respond in either a positive/negative manner or take a neutral (positive and negative) stance. In this instance, candidates are also expected to support their responses with more depth, e.g. 'CIDA eliminates time and costs spent✓ on lengthy civil court proceedings✓, because the employer will not be liable for compensation to the employee for injuries sustained during working hours as long as it can be proved that the business was not negligent.'✓

NOTE:

- 1. The above could apply to 'analyse' as well.
- 2. Note the placing of the tick (✓) in the allocation of marks.

12. The allocation of marks must be informed by the nature of the question, cognitive verb used, mark allocation in the marking guidelines and the context of each question.

Cognitive verbs, such as:

- 12.1 Advise, name, state, mention, outline, motivate, recommend, suggest, (list not exhaustive) do not usually require much depth in candidates' responses. Therefore, the mark allocation for each statement/answer appears at the end.
 - 12.2 Describe, explain, discuss, elaborate, compare, distinguish, differentiate, justify, devise, analyse, evaluate, critically evaluate (list not exhaustive) require a greater depth of understanding, application and reasoning. Therefore, the marks must be allocated more objectively to ensure that assessing is conducted according to established norms so that uniformity, consistency and fairness are achieved.
13. Mark only the **FIRST** answer where candidates offer more than one answer for **SECTION B** and **C** questions that require one answer.
14. **SECTION B**
- 14.1 If for example, **FIVE** facts are required, mark the candidate's **FIRST FIVE** responses and ignore the rest of the responses. Indicate by drawing a line across the unmarked portion or use the word 'Cancel'.
- NOTE:** This only applies to questions where the number of facts is specified.
- 14.2 If two facts are written in one sentence, award the candidate **FULL** credit. Point 14.1 above still applies.
 - 14.3 If candidates are required to provide their own examples/views, brainstorm this to come up with alternative answers.

An effective tool for promoting local growth and competitiveness? Gary Bland, Peter Vaz, 2017-04-17 This article examines the sustainability of the subnational business environment index BEIs as a development tool for subnational promotion of private sector growth and competitiveness We define sustainability as the BEI's continued application after its external support has been concluded The 13 BEIs examined here have been largely financed by international aid agencies over the past decade We compare the main features of all the current or recent subnational BEIs we could locate covering countries in Asia Eastern Europe and Latin America We discuss their origins financing conceptual approaches methodological parameters intergovernmental linkages and longevity A few of them have been applied repeatedly as intended by index proponents but nearly half of the indices have been discontinued Two are eminently sustainable and another appears to be The apparently successful index in El Salvador is highlighted We conclude that indices face serious limitations including politicization weak business sector interest lack of local funding and need for an impartial sponsor Yet indices do show some promise for reform where the index is well developed and where conditions that appear favorable to their successful utilization apply that is in countries with a strong private sector governmental interest and an open economy
