The Belgian Army and Society from Independence to the Great War Mario Draper,2018-02-13 This book explores Belgian state building through the prism of its army from independence to the First World War It argues that party politics which often ran along geographical linguistic and religious lines prevented both Flemings and Walloons from reconciling their regional identities into a unified concept of Belgian nationalism Equally it obstructed the army from satisfactorily preparing to uphold Belgium s imposed neutrality before 1914 Situated uneasily between the two powerhouses of nineteenth century Europe Belgium offers a unique insight into the concepts of citizenship and militarisation in a divided society in the era of fervent nationalism By examining the composition experience and image of the army s officer corps and rank and file as well as those of the auxiliary forces this book shows that although military and civilian society often stood aloof from one another the army as a national institution offered a fleeting glimpse into the dichotomy that was pre war Belgium

The Franco-Prussian War Karine Varley,2024-06-14 The Franco Prussian War of 1870 71 has traditionally been seen as a limited conflict between French and German forces This edited volume challenges this view and shows that it was a war of ideas values and perceptions which transformed the political diplomatic and military culture across Europe Based on interdisciplinary research the book suggests that the war raised new questions about power the nation violence and notions of civilization which brought about a decisive shift in how warfare was experienced and perceived While the Franco Prussian War may have begun as a traditional dynastic struggle it became a modern war and an important precursor to the First World War in its use of new weaponry and industrialized warfare At the same time the development of humanitarian movements and international law on the conduct of war meant that the fighting was subjected to unprecedented scrutiny while new technologies accelerated the pace at which narratives about the war were constructed and consumed This volume will appeal to scholars in the fields of war studies international relations and diplomacy and intellectual and cultural history It will also be a useful addition to undergraduate and postgraduate courses on nineteenth century European history and cultural studies

Fighting Terror after Napoleon Beatrice de Graaf,2020-10-01 After twenty six years of unprecedented revolutionary upheavals and endless fighting the victorious powers craved stability after Napoleon s defeat in 1815 With the threat of war and revolutionary terror still looming large the coalition launched an unprecedented experiment to re establish European security With over one million troops remaining in France they established the Allied Council to mitigate the threat of war and terror and to design and consolidate a system of deterrence The Council transformed the norm of interstate relations into the first modern system of collective security in Europe Drawing on the records of the Council and the correspondence of key figures such as Metternich Castlereagh Wellington and Alexander I Beatrice de Graaf tells the story of Europe s transition from concluding a war to consolidating a new order She reveals how long before commercial interest and

economic considerations on scale and productivity dictated and inspired the project of European integration the common denominator behind this first impulse for a unification of Europe in norms and institutions was the collective fight against terror
