Occultism in a Global Perspective Henrik Bogdan, Gordan Djurdjevic, 2014-09-11. The study of the ideas and practices associated with occultism is a rapidly growing branch of contemporary scholarship. However, most research has focused on English and French speaking areas and has not addressed the wider spread and significance of occultism. Occultism in a Global Perspective presents a broad international overview. Essays range across the German magical order of the Fraternitas Saturni, esoteric Satanism in Denmark, sexual magic in Colombia, and the reception of occultism in modern Turkey, India, and the former Yugoslavia. As any other form of cultural practice, the occult is not isolated from its social, discursive, religious, and political environment. By studying occultism in its global context, the book offers insights into the reciprocal relationships that colour and shape regional occultism. Basic Calculus of Planetary Orbits and Interplanetary Flight Alexander J. Hahn, 2020-03-14. Intended for a one or two semester course, this text applies basic one-variable calculus to analyze the motion both of planets in their orbits as well as interplanetary spacecraft in their trajectories. The remarkable spacecraft missions to the inner and outermost reaches of our solar system have been one of the greatest success stories of modern human history. Much of the underlying mathematical story is presented alongside the astonishing images and extensive data that NASA's Voyager, NEAR, Shoemaker, Cassini, and Juno missions have sent back to us. First and second-year college students in mathematics, engineering, or science, and those seeking an enriching independent study, will experience the mathematical language and methods of single-variable calculus within their application to relevant conceptual and strategic aspects of the navigation of a spacecraft. The reader is expected to have taken one or two semesters of the basic calculus of derivatives, integrals, and the role that limits play. Additional prerequisites include knowledge of coordinate plane geometry, basic trigonometry, functions, and graphs, including trigonometric, inverse, exponential, and log functions. The discussions begin

with the rich history of humanity's efforts to understand the universe from the Greeks to Newton and the Scientific Revolution to Hubble and galaxies to NASA and the space missions. The calculus of polar functions that plays a central mathematical role is presented in a self-contained way in complete detail. Each of the six chapters is followed by an extensive problem set that deals with and also expands on the concerns of the chapter. The instructor has the flexibility to engage them with greater or lesser intensity. I have been an aerospace engineer for 39 years and honestly it would be hard for me to overstate how valuable I believe this book will be to numerous scientific and engineering disciplines and in particular to the future of aerospace engineering. This book is perfectly crafted to motivate, educate and prepare the scientists and engineers who wish to reach for the sky and beyond. Dr Mario Zoccoli, Aerospace Engineer, NASA and Lockheed Martin. **Revisiting Relational Youth Ministry** Andrew Root, 2007-10-08. Andrew Root reviews the history of relational incarnational youth ministry in American evangelicalism and recasts the practice as one of place sharing, not so much earning the right to be heard as honoring the human dignity of youth and locating God in their midst. **The Sanskrit Epics** John Brockington, 2021-12-06. Mahabharata including Harivamsha and Ramayana, the two great Sanskrit Epics central to the whole of Indian Culture, form the subject of this new work. The book begins by examining the relationship of the epics to the Vedas and the role of the bards who produced them. The core of the work, a study of the linguistic and stylistic features of the epics, precedes the examination of the material culture, the social, economic and political aspects and the religious aspects. The final chapter presents the wider picture and in conclusion even looks into the future of epic studies. In this long overdue survey work, the author synthesizes the results of previous scholarship in the field. Herewith a coherent view is built up of the nature and the significance of these two central epics, both in themselves and in relation to Indian culture as a whole.

Zephaniah's Oracles against the Nations Ryou, 2021-08-30. Zephaniah's Oracles against the Nations deals with exegetical methods as well as their application to the text. The first part of the book examines the Hebrew text from the viewpoint of synchrony, employing insights from modern linguistic and literary theory. Such important concepts as text grammar, textual hierarchy, communicational and actantial analysis, on the one hand, and prosodic hierarchy and Hebrew versification, on the other, emerge from this discussion. The second part of the book discusses diachronical matters such as the redactional process, its theological and pastoral significance, and the hermeneutical implications of such diachronical study. Of special interest are the additional sections on the issues of the so-called woe cry and oracles against the nations in the Old Testament. This timely study is particularly useful for those interested in the linguistic analysis and literary interpretation of the Hebrew Bible. **Aztec Religion and Art of Writing** Isabel Laack, 2019-03-27. the writing system to provide a powerful interpretation of the Nahua sense of reality Laack transcends the concept of sacred scripture traditionally employed in religions studies in order to reconstruct the Indigenous semiotic theory and to reveal how Aztec pictography can express complex aspects of embodied meaning Her study offers an innovative approach to nonphonographic semiotic systems as created in many world cultures and expands our understanding of human recorded visual communication This book will be essential reading for scholars and readers interested in the history of religions Mesoamerican studies and the ancient civilizations of the Americas This excellent book written with intellectual courage and critical self awareness is a brilliant multilayered thought experiment into the images and stories that made up the Nahua sense of reality as woven into their sensational ritual performances and colorful symbolic writing system Dav d Carrasco Harvard University
