Sources for Latin America in the Modern World Nicola Foote, 2019 Latin America in the Modern World is the first text to situate the history of Latin American into a wider global narrative and it does so without de-emphasizing the distinctive experiences of each of the Latin American countries Focusing on five themes state formation the construction of national identity through popular culture and religion economics and commodities race class and gender and the environment and written by leading scholars Latin America in the Modern World provides students today with an entry point into understanding this vital region The authors emphasize the distinctive experiences of each of the Latin American countries Instead of suggesting that all Latin American nations have an interchangeable heritage the authors seek to clearly identify themes topics people and intellectual currents that help to knit the history of modern Latin America into a coherent category of study The book would not serve students well if it focused primarily on the history of the three largest countries Mexico Brazil and Argentina to the neglect of others like the Central American and Andean nations As a consequence case studies from almost all of the countries are included at some point in the narrative when their history seems to illuminate a theme or idea particularly effectively In this fashion students will come to appreciate the great diversity of history and culture within the Latin American region while simultaneously understanding how it fits into the streams and currents of world history and events more broadly *The Ethics of Cultural Studies* Joanna Zylińska, 2005-05-01 Ethical questions feature prominently on today's cultural and political agendas The Ethics of Cultural Studies presents an ethical manifesto for Cultural Studies an exploration of its current ethical and political concerns and of its future challenges The book is concerned with ethics in the material world and draws on examples as diverse as cloning and genetics asylum and immigration experiments in plastic surgery and in electronic and digital art memories of the Holocaust September 11th and media representations of violence and crime The Ethics of Cultural Studies is a groundbreaking intervention that sets the debate on ethics in cultural study and offers an invaluable source of ideas for students of contemporary culture *Vladimir Nabokov* Alan Levy, 2015-09-29 The Velvet Butterfly is the third in a series of introductions to some of our major literary figures by the noted cultural journalist and foreign correspondent Alan Levy
