Lemon-Aid Used Cars and Trucks

2011-2012 Phil Edmonston, 2011-04-25 As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon Aid Used Cars and Trucks 2011/2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon Aid Used Cars and Trucks is an exposé of car scams and gas consumption, a do it yourself service manual, an independent guide that covers beaters, lemons, and collectibles, an archive of secret service bulletins granting free repairs, and a legal primer that even lawyers can't beat. Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

Phil Edmonston, 2010-05-11 The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about. The Globe and Mail's Lemon Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive Dr. Phil for over 40 years, Edmonston pulls no punches. His Lemon Aid is more potent and provocative than ever. *Drum*, 2003-07

Customer-Oriented Quality Management in the Automotive Industry Marit Breitsfeld, 2005-02-28 Inhaltsangabe Abstract

In times of severe competition, it is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of the company. This thesis intends to show that a customer-focused quality management is one way to create a sustainable competitive advantage. Quality controls along the whole value chain, before, during, and after production, lead to failure-free products which save costs on the one hand and have thus a positive

influence on the company's revenue. On the other hand, failure-free products that meet the customers' expectations lead to satisfied customers who build up a brand loyalty and conduct retention sales which have a positive influence on the company's sales market share as well as the overall image. Furthermore, this thesis points out that it is important to listen to the voice of the customers and get an insight in the customer's needs and wants. To fulfil or even exceed their expectations leads to customer satisfaction which is a key to success in today's business world. In addition, the customer demands in regard of quality are growing continuously and new technologies are appearing on the markets on a regular basis. Therefore, the producers are forced to keep to the latest technology developments and to get hold on the changing customer needs. But even without this external pressure, quality improvement is justified from a cost point of view. The applicability of a customer-oriented quality management is shown in the practical part of this thesis when the quality of the Saab models is analyzed from the customer's perspective. Due to the arguments outlined in this thesis, it can be summarized that a quality management with a focus on the needs of the customers should become a core strategy of any company producing and selling products in order to create customer satisfaction and sustain the business. This thesis deals with the field of quality management in the context of customer satisfaction. To show the practical applicability of quality management, this thesis is looking at how quality management is conducted in the automotive industry as we compare the Initial Quality Study (IQS) from the market research institute J.D. Power with a survey that was internally conducted at the Saab Automobile AB. Today's business environment creates a growing need for quality management. Tougher competition leads to the demand for cost savings and higher *Car and Driver*, 2002.
