Mandate Madness James T. Bennett, 2017-07-05 What do drivers licenses that function as national ID cards nationwide standardized tests for third graders the late unlamented 55 mile per hour speed limit the outlawing of the eighteen year old beer drinker and the disappearing mechanical lever voting machine have in common Each is the product of an unfunded federal mandate a concept that politicians of both parties profess to oppose in theory but which in practice they often find irresistible as a means of forcing state and local governments to do their bidding while paying for the privilege Mandate Madness explores the history debate and political gamesmanship surrounding unfunded federal mandates concentrating on several of the most controversial and colorful of these laws The cases hold lessons for those who would challenge current or future unfunded federal mandates James T Bennett also examines legislative efforts to rein in or repeal unfunded federal mandates Finally he reviews the treatment of unfunded mandates by the federal courts Those who find wisdom in America's traditional federalist political arrangement maintain perhaps with more wishfulness than realism that the unfunded federal mandate has not yet joined death and taxes as an immovable part of the modern political landscape

United in Diversity? Jens Alber, Neil Gilbert, 2009-10-07 Since the advent of the European Union politicians have increasingly emphasized the notion of a European social model as an alternative to the American form of market capitalism which is seen as promoting economic growth without regard for solidarity and social progress As this political discourse has advanced social scientists and academic policy analysts have raised questions concerning the extent to which the E U and U S social models exist outside the minds of diplomats and politicians seeking to stitch together a common identity How much unity is there still within Europe after the Eastern enlargements have considerably increased economic and cultural diversity To whatever extent one might discern a distinct set of commonalities

that represent the core of a European approach how different are the European characteristics of social economic and political life from those of America Addressing these issues this book systematically analyzes how much European countries and the United States have in common and how much variation we find within the enlarged European Union in eight central spheres of socio economic and political life employment equality mobility educational opportunity integration of immigrants democratic functioning political participation rights to welfare and levels of public spending Drawing on empirical analyses by U S and European scholars who represent multi disciplinary backgrounds each of these topics is put under scrutiny The results of this study illuminate points of convergence and divergence as seen from the perspectives of scholars from both sides of the Atlantic
