Services comprise about 70% of the BNP in most Western societies. Services surround us each and every day and include such sectors as medical, IT, financial, travel, telecommunication and educational. This book is about services and has been written for service managers and practitioners as well as students who aim to move into those areas. The book outlines the fundamental issues of service and service management, offering support by discussing some twenty different business administration models. Real world examples from both non-profit and for-profit sectors are used throughout the book as well as what to do summaries. This text provides an excellent introduction to service management for students of marketing, economics, business administration, hospitality management and other courses.

Customer-Oriented Quality Management in the Automotive Industry Marit Breithfeld, 2005-02-28. Inhaltsangabe Abstract. In times of severe competition, it is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of the company. This thesis intends to show that a customer-focused quality management is one way to create a sustainable competitive advantage. Quality controls along the whole value chain, before, during and after production, leads to failure-free products which save costs on the one hand and have thus a positive influence on the company's revenue. On the other hand, failure-free products that meet the customers' expectations lead to satisfied customers who build up a brand loyalty and conduct retention sales which have a positive influence on the company's sales, market share as well as the overall image. Furthermore, this thesis points out that it is important to listen to the voice of the customers and get an insight in the customer's needs and wants. To fulfil or even exceed their expectations leads to customer satisfaction which is a key to success in today's business world. In addition, the customer demands in regard of quality are growing continuously and new technologies are appearing on the markets on a regular basis. Therefore, the

producers are forced to keep to the latest technology developments and to get hold on the changing customer needs But even without this external pressure quality improvement is justified from a cost point of view The applicability of a customer oriented quality management is shown in the practical part of this thesis when the quality of the Saab models is analyzed from the customer s perspective Due to the arguments outlined in this thesis it can be summarized that a quality management with a focus on the needs of the customers in should become a core strategy of any company producing and selling products in order to create customer satisfaction and sustain the business This thesis deals with the field of quality management in the context of customer satisfaction To show the practical applicability of quality management this thesis is looking at how quality management is conducted in the automotive industry as we compare the Initial Quality Study IQS from the market research institute J D Power with a survey that was internally conducted at the Saab Automobile AB Today s business environment creates a growing need for quality management Tougher competition leads to the demand for cost savings and higher
