The two separate papers that comprise this special issue are reviewing 100 African BPRs with an 'early' (1990s) perspective. The first review is of 100 African BPRs that have only the 1990s data and reports on the findings being sought in the introduction. (Given the limited BPR data available, the perspective on 100 African BPRs is not intended to be the best possible performance of a meta-analysis, or yet a second look at BPRs by a later reviewer.)

1999 also saw significant shifts in the United Kingdom foreign policy. Since 1998, there has been a growing emphasis on the high environment-politics interface, and it can be seen that Britain is supporting as it can the stronger parts of the international agenda, while the emerging political issues – as in climate change – remain secondary. The British position is particularly sensitive to the issue of environmental trade, a subject concerning the British business community. Efforts to establish a trade in climate change have been, however, relatively ineffective, especially in comparison with the EU's initiatives and broader trade. The EU's initiative to formalise trade in soil & forest resources, however, will be a first in the foreign policy arena. Since 1999, the EU has been successful in the environment. EU's progress in the United Kingdom will be a significant factor in the foreign relations of EU countries in the 21st century. There is a growing emphasis on the environment.

There are several factors that may influence the rate and outcome of these processes.
