Abstract

The purpose of this study was to investigate the effectiveness of web-based biology learning environment in improving academic performance via a meta-analysis. In looking for the studies on web-based biology learning environment, several keyword patterns from the abstracts (e.g., Pattern 1: web-based learning and biology education) were recruited in well-known databases (e.g., ERIC, EBSCO, Springer Link). Finally, 22 papers were apparent for the current meta-analysis examining the effect of web-based biology learning environment on academic performance. All statistical data from the studies were initially inserted into an Excel sheet and then imported into comprehensive meta-analysis (CMA) statistics software to calculate Hedges' g values. The overall effect-size of web-based biology learning environment pointed to a medium effect. Also, it was found that the educational level and type of experimental design, as moderator variables, did not positively affect the students' academic performance along with web-based biology learning environment. In light of the findings, it can be concluded that web-based biology learning environment is somewhat effective at improving the students' academic performance. The current study recommends that further studies should be undertaken to deepen the implementation processes of the studies with extreme values and explore what makes them unique.

Introduction

Web-based learning environment, as a hypermedia centred instructional programme, enables researchers to build a meaningful learning environment by means of the attributes and resources of the World Wide Web (e.g., immediately updating, disseminating, and sharing data) (Khan, 1997; Rosenberg, 2001). Hence, it not only proposes to enhance and support student learning but also offers an alternative pedagogy for science learning (Khan, 1997; Morento et al., 2014). Further, it gives an opportunity for students to control information, access other relevant resources, communicate

with peers, and upload any related information to the database if necessary (Castro & Tumbay, 2021). Moreover, it establishes synchronous and/or asynchronous communication (e.g., e-mail, file transfer, discussion and news groups) between students and teachers through interactive web pages, and internet services such as chat rooms (Tüysüts & Aydın, 2007; Bell & Fedeman, 2013). Also, it helps teachers record and save the data about students' learning processes and outcomes. Because web-based learning, online learning, virtual laboratory, and e-learning generally use internet or webpages/sites (Miodusier et al., 2000; Santos & Prudente, 2022), the current paper prefers calling them web-based learning environment (WBLE) that facilitates student learning.

The WBLE also contains several challenges that need to be well-planned and handled before its usage. In view of Torum (2003), three main elements (infrastructure or logistics, educational and economic) directly influence the effectiveness of the WBLE or its achievement degree. That is, it requires a solid infrastructure system such as computer hardware and internet connection. Also, since it requests students to have some skills (e.g., the use of computer and internet) and affective features (e.g., self-regulated learning, self-confidence,

One of the significant advantages of Web Based Biology books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers.
