

Biology I: The Ultimate Genetics Webquest

This webquest will guide you through the “Big Ideas” of Genetics, from Mendel’s first pivotal experiments to practicing some of the more recent advances in genetic research on your own! Please record your answers to each section on the answer sheet provided. This will be submitted to your instructor for a grade.

THIS WEBQUEST IS DUE ON: _____

INTRODUCTION

- I. View the YouTube video Heredity: Crash Course Biology #9 at <http://www.youtube.com/watch?v=CBezq1ffUEA>. Answer the questions provided in your answer packet.

WHO IS MENDEL?

- II. Mendel is often called the “Father of Modern Genetics”. Check out the basic ideas behind his experiments at http://anthro.palomar.edu/mendel/mendel_1.htm. Pay close attention how Mendel designed his experiments. Most of Mendel’s early work in genetics can be summarized in two major principles, the Law of Segregation and the Law of Independent Assortment. Answer the questions provided in your answer packet.

HINT: If you don’t understand an underlined term, click on it for a short definition!

After you have finished learning about Mendel, click on “Practice Quiz” and quiz yourself. Then click “next topic” on the bottom of the page and learn about Punnett Squares and the Probability of Inheritance.

- III. Carefully read over “Probability of Inheritance” at http://anthro.palomar.edu/mendel/mendel_2.htm. The Punnett Square is an important tool used to determine the PROBABILITY of having offspring with a particular genotype. By the time you have finished this section, you should understand how to complete and interpret a monohybrid cross using a Punnett Square. You should be able to clearly explain the difference between GENOTYPE and PHENOTYPE in genetics.
