**The Semantic Web** Ruben Verborgh, Katja Hose, Heiko Paulheim, Pierre-Antoine Champin, Maria Maleshkova, Oscar Corcho, Petar Ristoski, Mehwish Alam, 2021-05-31 This book constitutes the refereed proceedings of the 18th International Semantic Web Conference ESWC 2021 held virtually in June 2021 The 41 full papers and 2 short papers presented were carefully reviewed and selected from 167 submissions The papers were submitted to three tracks the research track the resource track and the in use track These tracks showcase research and development activities services and applications and innovative research outcomes making their way into industry The research track caters to both long standing and emerging research topics in the form of the following subtracks ontologies and reasoning knowledge graphs understanding creating and exploiting semantic data management querying and distributed data data dynamics quality and trust matching integration and fusion NLP and information retrieval machine learning science data and scholarly communication and problems to solve before you die

**Scalable Optimization via Probabilistic Modeling** Martin Pelikan, Kumara Sastry, Erick Cantú-Paz, 2007-01-12 I m not usually a fan of edited volumes Too often they are an incoherent hodgepodge of remnants renegades or rejects foisted upon an unsuspecting reading public under a misleading or fraudulent title The volume Scalable Optimization via Probabilistic Modeling From Algorithms to Applications is a worthy addition to your library because it succeeds on exactly those dimensions where so many edited volumes fail For example take the title Scalable Optimization via Probabilistic Modeling From Algorithms to Applications You need not worry that you re going to pick up this book and nd stray articles about anything else This book focuses like a laser beam on one of the hottest topics in evolutionary computation over the last decade or so estimation of distribution algorithms EDAs EDAs borrow evolutionary computation s population orientation and selectionism and throw out the genetics to give us a hybrid of substantial power elegance and extensibility The article sequencing in most edited volumes is hard to understand but from the get go the editors of this volume have assembled a set of articles sequenced in a logical fashion The book moves from design to efficiency enhancement and then concludes with relevant applications The emphasis on efficiency enhancement is particularly important because the data mining perspective implicit in EDAs opens up the world of optimization to new methods of data guided adaptation that can further speed solutions through the construction and utilization of effective surrogates hybrids and parallel and temporal decompositions

**The Code** Margaret O'Mara, 2020-07-07 One of New York Magazine's best books on Silicon Valley The true behind the scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O'Mara became one of our most consequential historians of the American led digital revolution she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet There she saw firsthand how deeply intertwined Silicon Valley was with the federal government and always had been and how shallow the common understanding of the secrets of the Valley's success actually was Now after almost five years of pioneering research O'Mara has produced the definitive history of Silicon Valley for our time the story of mavericks and visionaries but also of powerful institutions creating the framework for innovation from the Pentagon to Stanford University It is also a story of a community that started off remarkably homogeneous and tight knit and stayed that way and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second order effects Deploying a wonderfully rich and diverse cast of protagonists from the justly famous to the unjustly obscure across four generations of explosive growth in the Valley from the forties to the present O'Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form She is on the ground with all of the key tech companies chronicling the evolution in their offerings through each successive era and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years Perhaps most impressive O'Mara has penetrated the inner kingdom of tech venture capital firms the insular and still remarkably old boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market or not The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams and increasingly our nightmares can be understood in Margaret O'Mara's masterful hands as the story of one California valley As her majestic history makes clear its fate is the fate of us all [Code of Federal](#)
