The Multi-age Learning Community in Action Barbara Cozza, 2017-09-18 As schools struggle to teach all students the multi age teaching and learning framework has emerged as one of today s most effective ways to structure schools Multi age Learning Community MAC Program is a professional development program in action It presents a framework that can transform schools from a graded system to a multi age learning environment This multi age school targets students individual and personal needs and allows students to excel and succeed The school reform climate today focuses on schools of choice and building effective school environments This multi age program creates a unique school niche that is marketable to families Parents have the option of sending their children to schools that concentrate on achievement that best meets the needs of the learner without disrupting the mandates of the curricula This book is intended to assist educators at all levels of all school organizations as well as give policymakers educators and parents the information on an effective school program This book gives information on how to transform schools into multi age classrooms This book is divided into four parts that explain both the theory and the practice of effective strategies for the multi age school program Organizational Practice Building Culture Learning Processes and Assessment and Systemic Improvement There are specific basic principles and practices that are integrated into a quality and effective framework discussed in the chapters of this book Each chapter

begins with a vignette based on my experiences in multiage schools and concludes with an educator's reflection to recap the concepts in the chapter. Each chapter also integrates snapshots that are short real-to-life passages that bring to life concepts discussed in the chapter. Although this book discusses multi-age schools, these ideas may be applied to all school environments. To accommodate all school programs, at the end of each chapter, a section titled "Application for All Schools" is a framework that discusses just how to apply chapter concepts in any school or classroom program. It is recommended that the reader review the book one time in sequence and then reread each chapter as needed to give meaning to the reader's purpose.

Becoming a teacher Josef de Beer, 2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum or work-integrated learning (WIL), which is an essential component of pre-service teacher education as the elephant in the room. These authors note that the capstone experience in any teacher education programme is the student teaching practicum. After all, this is where the rubber hits the road. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the gap that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4, researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg. Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely where safe spaces or laboratories are created for student teachers to learn and grow professionally. These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2, student excursions as the findings in chapters 5, 7, and 10 portray, or alternative approaches to WIL, e.g., Chapters 11 and 12. The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Now That's a Good Question! Erik M. Francis, 2016-07-22 In this book, Erik M. Francis explores how one of the most fundamental instructional strategies, questioning, can provide the proper scaffolding to deepen student thinking, understanding, and application of knowledge. You'll learn techniques for using questioning to extend and evaluate student learning experiences. Eight different kinds of questions that challenge students to demonstrate higher-order thinking and communicate depth of knowledge. How to rephrase the performance objectives of college and career readiness standards into questions that engage and challenge

students Francis offers myriad examples of good questions across content areas and grade levels as well as structures to help teachers create and use the different kinds of questions By using this book to fine tune your approach to questioning you can awaken the spirit of inquiry in your classroom and help students deepen their knowledge understanding and ability to communicate what they think and know
