into driving and even city motorists smile when they're at the wheel of a smart. But it nearly didn't happen at all. The revolutionary design was the product of the genius who invented the Swatch watch, saving the near bankrupt Swiss watch industry in the process. But these visionary ideas proved too radical and the tiny two-seater almost died at birth when a succession of backers lost their nerve. The sensational story of smart traces the decade-long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time.
