Drugs Great Britain: Parliament: House of Commons: Home Affairs Committee,2012-12-10 Whilst it supported a number of steps the Government has taken in its 2010 drug strategy it believes more needs to be done to comprehensively address the drugs problem in the UK The report focuses on the need to break the cycle of drug addiction and highlights in particular the need for improved treatment in prisons and wider society and for early intervention with better education and preventative work Three key areas were covered prisons treatment and the calling for the establishment of a Royal Commission into the issues The Committee was disturbed to find that almost a quarter of prisoners found it easy to get drugs in prison and recommended that measures such as regular random drug tests based on suspicion be increased It was concerned that the Government s policy of recovery was not being implemented in particular that drug rehabilitation in prison was undermined by the lack of support for offenders on release and did not take into account prescription drug addiction The Committee is also concerned that the goal of retaining addicts in treatment has precluded attempts at recovery It supported the Government s objective of recovery but noted that this will require a range of treatment options with each individual needing a tailored treatment plan The Committee highlighted residential rehabilitation and the use of buprenorphine as an alternative to methadone as two treatment methods which were currently under utilised Treatment must also be supplemented by housing training and employment support if required

The Clinic and Elsewhere Todd Meyers,2013-05-15 Despite increasingly nuanced understandings of the neurobiology of addiction and a greater appreciation of the social and economic conditions that allow drug dependency to persist there remain many unknowns regarding the individual experience of substance abuse and its treatment In recent years novel pharmaceutical therapies have given rise to both new hopes for recovery and renewed fears about drug diversion and abuse In The Clinic and Elsewhere Todd Meyers looks at the problems of meaning caused by drug dependency and appraises the changing terms of medical intervention today By following a group of adolescents from the time they enter drug rehabilitation treatment through their reentry into the outside world the clinic their homes and neighborhoods and other institutional settings Meyers traces patterns of life that become mediated by pharmaceutical intervention His focus is not on the drug economy but rather on the therapeutic economy where new markets transactions of care and highly porous conceptions of success and failure come together to shape addiction and recovery The book is at once a meditative work of anthropology a demonstration of the

theoretical and methodological limits of medical research and a forceful intervention into the philosophy of therapeutics at the level of the individual Watch the trailer <http://www.youtube.com/watch?v=Nfyy21fxp8list> UUge4MONgLFncQ1w1C_BnHcw index 12 feature plc Practical Psychology in Medical Rehabilitation Maggi A.
