Venture Capital Investment and Government Incentives Tamara

Wilkinson, 2024-09-05. This book explores the best ways for governments to design venture capital investment incentives. Venture capital is a multi-billion dollar industry and a major driver of innovation and national growth. Investment in startup companies by venture capital funds helps finance new inventions and create wealth, economic growth, and jobs. However, because venture capital investment is highly risky and sensitive to market downturns, many governments around the world use special legal and tax incentives to help encourage this form of investment. Since the introduction of the first venture capital incentive in the USA in 1958, scores of venture capital incentives have come and gone. These incentives have experienced varied success, with some failing entirely. Filling a gap in an important area, this book employs a legal and regulatory approach to examine venture capital policy from a global perspective. It uses an analytical framework to evaluate

the design implementation and success of incentives and looks at over 60 examples from 25 countries around the world The book is aimed at researchers and policy makers in law finance and economics as well as practitioners and investors in the venture capital space The book introduces the legal aspects of venture capital investment and presents a list of leading practice guidelines and recommendations to help policy makers design effective efficient and appropriate venture capital incentives
