Creating a Useful Science of Education R. Barker Bausell, 2017-10-04 Bausell provides a restrictive but defensible view of the purpose of educational research which is to produce instructional curricular or assessment products rather than seldom read and soon forgotten academic papers This book poses and answers two questions a whether it is possible for the science of education to develop into a discipline that could constructively impact the education of students and if so b what type of research would be required for this transformation Three genres of research were identified that possess the potential for impacting school instruction if the end result of this work is an instructional product capable of increasing learning by increased access to instruction or engagement therewith Finally specific suggestions are tendered for creating the infrastructure needed to realize this unique vision of what the science of education should be **Bridges to**
