McQuillan,Laura Schall-Leckrone,Brad Kershner,Anna Noble Dunphy,Ksenia Filatov,2025-02-20 The research in this volume

draws on aspects of complexity theory and its integral link to systems performance to propose a new method for combatting the longstanding opportunity gap and related underperformance of so many underserved students in the American educational system Through a longitudinal case study of the Lynch Leadership Academy at Boston College this research considers the initial conditions and related disequilibrium principals experienced the degree to which principals shared power and authority within their school context and the extent to which they generated a shared school culture founded on collaboration and systematic reflection From these data the authors create a detailed picture of the Academy and its impact on the principals and their schools using a new analytic tool called the systems transformation heuristic designed by the authors to quantify the qualitative dimensions of a school s efforts to enact adaptive change consistent with the complex adaptive system metaphor As such it offers a new foundation for conceptualizing ongoing systems change as well as a fresh model for school personnel to consider their experience from concrete intertwined and unique points of view It will appeal to scholars researchers and practitioners with interests in educational leadership complexity theory urban education and social justice

*Trust Territory of the Pacific Islands* ,1975 **Touch Screen Tablets Touching Children's Lives** Joanne Tarasuik,Gabrielle Strouse,Jordy Kaufman,2018-02-28 Touch screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that they do not require the fine motor skills required for using traditional computers Many parents and educators wish to make evidence based decisions regarding young children s technology use yet technological advancements continue to occur faster than researchers can keep up with Accordingly despite touch screen tablets entering society more than 5 years ago we are in the infancy of

research concerning interactive media and children The topic has gained traction in the past couple of years For example theoretical papers have discussed how interactive media activities differ from physical toys and passive media Christakis 2014 and how educational apps development should utilise the four pillars of learning Hirsh Pasek et al 2015 Yet there has been little experimental research published on young children and touch screen use
