**Keith Bright, Geoffrey Cook**

## SII Guide Lg12:

*The Colour, Light and Contrast Manual* Keith Bright, Geoffrey Cook, 2010-01-06 Endorsed by the Society of Light and Lighting this practical book offers comprehensive guidance on how colour light and contrast can be incorporated within buildings to enhance their usability. The book provides state of the art clear guidance as well as a valuable information source for busy professionals involved in the design or management of new and existing environments. The ways colour light and contrast are used within built environments are critical in determining how people interact with the space and how confident safe and secure they will feel when doing so. They also have a major influence on a person's sense of well being and their ability to use the environment independently and without undue effort. Understanding how to use colour and contrast and how they are influenced by both natural and artificial lighting is vital for all those involved in the design and management of the environments and spaces we all use. In recent years there has been a considerable amount of work undertaken to further our understanding of how colour light and contrast affect emotion and sensory abilities and how they can assist or hinder people in their everyday lives. Other publications consider these issues individually but *The Colour Light and Contrast Manual* designing and managing inclusive built environments draws knowledge and information together to produce a unique comprehensive and informative guide to how the three elements can work together to improve the design and management of environments for us all. **Lighting: Interior and Exterior** Robert Bean, 2014-01-21 This comprehensive and practical guide takes you step by step through the core concepts and applications of architectural lighting. Now completely revised and updated for the second edition this book includes all new information on the latest regulations and recommendations. Provides special attention to the rapid development of LED lighting. Considers the new CIE colour metric system. Concludes each chapter with questions for the reader together with inverted appropriate answers. Features full colour throughout for the first time to support the text and aid the reader. Covering a wide range of building types and external environments this book shows how the concepts used in lighting design arise from the needs of the designer and user. These concepts are given a practical context to enable you to develop and improve your design skills building up from the basics of how much light is needed and the role of shadows to energy management and the calculations for daylighting. The author provides accessible user friendly explanations of technical information and specialist techniques intended for people who need to get to the heart of the subject as quickly as possible. An indispensable learning tool for students and for professionals developing their skills this handbook provides examples and exercises to help you acquire the understanding knowledge and skill required for examinations and professional training purposes.
