Smart Serve Training Manual:

Serviceology for Smart Service System Yuriko Sawatani, James Spohrer, Stephen Kwan, Takeshi Takenaka, 2016-10-05
Services are key activities in a globalized economy and they also underlie the quality of life of local residents. The advanced work presented in this book was selected from the proceedings of the Third International Conference on Serviceology ICServ2015 held July 7-9, 2015 in San Jose, CA, USA. The conference was supported by the Society for Serviceology. The society was established in 2012 in Japan to explore the scientific systematization of services and to promote technological developments for solutions to industrial issues. This book provides a useful general guide to the state of the art in the theory and practice of services. It can also serve as a valuable reference book for researchers in a wide range of fields from engineering to marketing and economics. Handbook of Research on Natural Language Processing and Smart Service Systems Pazos-Rangel, Rodolfo Abraham, Florencia-Juarez, Rogelio, Paredes-Valverde, Mario Andrés, Rivera, Gilberto, 2020-10-02. Natural language processing (NLP) is a branch of artificial intelligence that has emerged as a prevalent method of practice for a sizeable amount of companies. NLP enables software to understand human language and process complex data that is generated within businesses. In a competitive market, leading organizations are showing an increased interest in implementing this technology to improve user experience and establish smarter decision-making methods. Research on the application of intelligent analytics is crucial for professionals and companies who wish to gain an edge on the opposition. The Handbook of Research on Natural Language Processing and Smart Service Systems is a collection of innovative research on the integration and development of intelligent software tools and their various applications within professional environments. While highlighting topics including discourse analysis, information retrieval, and advanced dialog systems, this book is ideally designed for developers, practitioners, researchers, managers, engineers, academicians, business professionals, scholars, policymakers, and students seeking current research on the improvement of competitive practices through the use of NLP and smart service systems. Food Service Management Marcy Schveibinz, 1992. The Entrepreneur's Strategy Guide Tom Cannon, 2006-09-30. In an environment where the chances of failure are much greater than success, what will make your company a winner? Drawing from fifty years of experience, research, and observation in entrepreneurial strategy, Tom Cannon offers a game plan for entrepreneurs. Dividing the book into two basic parts: the marketplace/external environment and the organization/internal environment, he outlines the ten core capabilities that every business must master in order to be successful. Illustrating each principle through examples of real companies and engaging the reader through diagnostics, checklists, and other interactive exercises, Cannon presents an essential resource for entrepreneurs, managers of startups, spinoffs, and other entrepreneurial units, and students of strategy and business development. At the heart of the book is an emphasis on how entrepreneurs can execute ambitious visions and strategies by mastering the basics and recognizing opportunities to continuously improve and innovate. Special Reference Briefs, 1983.
