## Rules for Driving

### Aim High in Steering

The driver should steer and focus their attention high, to view the road as a whole and not just a few feet ahead. Keeping dangers of the road in mind will help avoid rear-end collisions and tell other drivers behind you to slow down by seeing, evaluating and acting upon distant information.

### Get the Big Picture

Be aware of your surroundings at all times. This may be a given, but distracted drivers are just as dangerous as intoxicated drivers. You can avoid accidents by observing how other drivers are behaving and by staying aware of all possible dangers.

### Keep Your Eyes Moving

Along with keeping the big picture, you need to stay alert on the road. Drinks with large amounts of caffeine will only keep you awake so long before your body crashes. Consistent eye movement can keep your mind and body alert while driving for long periods of time.

### Leave Yourself an Out

Don't get yourself in a situation that you cannot escape. Make sure to allow room between your rig and other truckers. Never let yourself get boxed in between others while they choose their desired lane. Keep a safe following distance and anticipate choices of others on the road.

### Make Sure You Are Seen

Never assume that other drivers can see you. This rule of the system prevents accidents by removing assumptions made by drivers behind the wheel. Make sure other drivers can see you and can anticipate your next move. Use your blinker and horn if necessary to alert others of your next move.
