Crystal Reports .NET Programming Brian Bischof, 2004 I wrote this book from the perspective of a programmer wanting to learn how to integrate reports within a NET application I ve been working with Crystal Reports since Visual Basic 3 and it s always been difficult to find technical information on report writing I spent a year and a half researching what NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of NET programmers using Crystal Reports The first type of programmer doesn t have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and

integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals

September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected

Professional Crystal Reports for Visual Studio .NET David McAmis, 2004-04-14 What is this book about The addition

of Crystal Reports 9.0 to Visual Studio .NET 2003 offers developers a reporting tool that allows you to turn almost any data into interactive dynamic content through portals, wireless devices, and Microsoft Office documents. This code-intensive guide takes you step by step through developing reports and incorporating them into applications. First, you gain a thorough understanding of how this version of Crystal Reports differs from previous versions and how it fits into the .NET platform. Then you begin creating reports and learn how to integrate them into both Windows and Web-based applications. You explore XML Web services, find out how to work with ADO.NET, and learn to use formulas and logic in your reports. Finally, you develop distributed reporting applications and discover how to deploy the applications you have created. Packed with real-world examples of working applications, this comprehensive second edition provides a complete understanding of commonly used features, examples of integration with a variety of databases and platforms, and much more. What does this book cover? Here are some details on what you'll discover in this book:

- Advanced report design
- Methods for creating reports using the Expert
- How to integrate reports into Windows and Web-based applications
- Development and deployment of distributed reporting applications
- How to create XML Report Web Services and work with ADO.NET
- Tips for using parameters with Crystal Reports and customizing the report content at run time
- Options for working with different data sources
- How to use the features contained in the properties, methods, and events associated with the Crystal Reports engine
